Career Objective	To contribute as a Software Developer by leveraging strong proficiency in C#, JavaScript, HTML, and CSS alongside hands-on experience in building secure, scalable, and responsive interfaces. Passionate about crafting digital tools that solve real-world problems, with a proven track record in collaborative development, API integration, and user-centric UI/UX improvements within Agile and CI/CD environments.	
Personal Profile	Innovative and results-oriented Software Developer with a hybrid background in biomedical science and full-stack development. Co-developed data-driven systems including maritime safety platforms and real-time object detection tools, combining C#, Python, and modern web technologies. Skilled in crafting accessible, responsive interfaces with HTML, CSS, JavaScript, and frameworks such as React. Adept at implementing RESTful APIs, managing version control in Git/GitLab, and working within Agile sprints. Committed to writing clean, testable code and delivering user-centered solutions that support health, safety, and development goals.	
Education	Kisii University	2016-2020
	BSc Biomedical Sciences and Technology - Second class honors (Upper)	
	Chesamisi Boys High School	2011-2015
	Kenya Certificate of Secondary Education - B+ 73 points.	
	Institute of Software Technology	FEBRUARY -APRIL (2023)
	Certificate in Software Development - completed	
Working Experience	Flowpoint ApS	SEPTEMBER 2023 - FEBRUARY 2025
	Remote Software developer	
	1. Collaborated on the development of SafeRoute, a maritime evacuation system, integrating C# and Python to build secure, real-time safety tools for ship crews and passengers.	
	2. Co-developed a real-time object detection and people counting system for museum environments using Python, OpenCV, and YOLOv8, improving crowd monitoring and reporting.	
	3. Implemented and maintained RESTful APIs, enabling seamless communication between services and front-end interfaces.	
	4. Participated in UI/UX improvements using HTML, CSS, and JavaScript frameworks, ensuring cross-browser compatibility and responsive design.	
	5. Managed version control with Git and GitLab, including branching strategies, pull requests, and resolving merge conflicts in a CI/CD environment.	
	6. Wrote clean, maintainable, and well-documented code following SOLID principles and industry best practices.	
	7. Performed unit testing and integration testing to ensure system stability and accuracy.	
	8. Optimized SQL queries and database structure to improve application performance..	
	FullCare Surgical Ltd	

1. Delivered product demos and closed over 60 B2B deals across hospitals and clinics.
2. Tracked leads and improved customer engagement via CRM tools and personalized outreach.
3. Worked with procurement officers to meet regulatory and logistical needs.review sales performance.

Kenya Medical Research Institute

Attachee

JULY - SEPTEMBER 2019

Section Attached.

1. Clinical chemistry.
2. Hematology.
3. Parasitology.
4. Immunology and Serology.
5. Histopathology.

Core Competencies

Programming Skills

1. Programming Languages: Proficient in C#, Java, and SQL – ideal for enterprise, backend, and database-driven applications.
2. Web Technologies: Strong grasp of HTML, CSS, and JavaScript for building responsive, user-centric web interfaces.
3. Frameworks & Libraries: Experienced with React, Node.js, Spring Boot, and TypeScript for scalable full-stack development.
4. Version Control: Skilled in Git and GitLab for code versioning, branching strategies, and CI/CD collaboration.
5. Tools & Platforms: Practical knowledge of Bootstrap, Redux, Laravel, and REST APIs for frontend and backend integration.

Project Management

1. Proficient in project planning, execution, and monitoring
2. Skilled in task prioritization, time management, and resource allocation
3. Familiar with project lifecycle methodologies .
4. Strong stakeholder communication and reporting abilities

Projects

Personal Projects:

25+5 Clock App, JavaScript Calculator, Drum Machine, Random Quote Machine – Built interactive front-end projects using React and JavaScript.

(Verified at: freecodecamp.org/certification/Okumu/front-end-development-libraries)

Professional Projects:

1. Real-Time Dashboard App: Built an offline object-counting tool using Electron and HTML5.
 2. E-Commerce Platform: Developed a secure Laravel-based site with authentication and payment integration.
 3. JavaScript Calculator: Designed a responsive calculator with enhanced UX features.
-

Achievements & Awards

Awarded a certificate for offering voluntary sanitation services at Kisii Teaching and Referral Hospital

Professional Affiliations

1. Biomedical Society of Kenya. (BSK)
2. East African Health Research Commission (EAHRC).

Certifications

Foundational C# -Microsoft

Demonstrated proficiency in object-oriented programming, data structures, and building scalable desktop applications, with emphasis on clean coding principles and .NET frameworks.

Front-End Development Libraries Certification FreeCodeCamp

Gained practical skills in React, Bootstrap, jQuery, and Sass for building responsive, component-based web interfaces.

Project Management -Oxford Home Study Center (OHSC)

Gained practical knowledge in planning, executing, and closing projects efficiently, including stakeholder management and risk assessment.

Good Clinical Practice(GCP)-CITI Program in collaboration with Kenya Medical Research Institute

Trained in the ethical and scientific standards for designing, conducting, and reporting clinical research involving human participants.

Biomedical Responsible Conduct of Research - CITI program in collaboration with Kenya Medical Research Institute

Covered ethical practices in biomedical research, including data integrity, authorship, peer review, and conflict of interest management.

Field Data Collection and Contact Follow-Up – World Health Organization (WHO)

Learned field-level surveillance and data reporting skills, including community engagement and mobile data collection methods during health emergencies.

Leadership and Volunteer Experience

Member , Kisii University Medical Student Association (KUMSA) -2016-2020

Actively participated in academic events, peer mentorship, and public health awareness drives on campus and within Kisii County, promoting student welfare and biomedical ethics.

Charity Event Coordinator -Kisii Town, 2019

Spearheaded a community outreach program in partnership with local churches and student organizations, distributing food, clothing, and hygiene supplies to over 100 low-income families. Mobilized volunteers, secured donations, and coordinated logistics to ensure successful event delivery..

Community Health Volunteer -Kisii Teaching &Referral Hospital, April 2018

Participated in community-based health education campaigns focusing on sanitation, maternal health, and disease prevention. Engaged with patients, assisted clinicians during outreach visits, and supported record-keeping and logistics.

Class and Dormitory Secretary -Chesamisi Boys High School , 2012-2015

Coordinated academic schedules and disciplinary communication between students and faculty; recognized for reliability and initiative in resolving student concerns

Interests

Charity service Interacting with people Travelling Reading documentary Reading novels
