

BECKHAM JOSSY

IT Support Engineer | Windows, Linux & User Operations

beckhamjossyo@gmail.com | +254 706 817 482 | Nairobi, Kenya | linkedin.com/in/beckham-jossy

PROFESSIONAL SUMMARY

IT Support Engineer with hands-on experience supporting end users in Windows and Linux environments. Skilled in incident triage, root-cause analysis, and resolving hardware, OS, access, and network-related issues under SLA-driven conditions. Experienced in working with ticketing systems, documentation, and escalation workflows. Cloud exposure (AWS) strengthens diagnostic depth, automation, and systems-level troubleshooting.

EXPERIENCE

Upwork (Freelance Contract), Cloud Solution Architect 06/2025 – Present | Remote — Global

- Designed and implemented AWS and OCI cloud architectures for global clients, focusing on security, scalability, and cost efficiency.
- Translated business requirements into production-ready cloud solutions using Terraform and best-practice architectures.
- Led cloud migrations and system improvements from legacy or on-prem environments.
- Troubleshoot complex cloud issues and delivered architectural guidance to clients.

Amazon Web Services (AWS) ☑, Cloud Support/Solutions Architect - Intern 02/2025 – 05/2025 | Nairobi, Kenya

- Built AWS Auto-Troubleshooter, a Lambda-driven diagnostics engine that reduced issue resolution time by 30%, cutting average time-to-resolution from ~2 hours to ~1. hours.
- Developed Project Aegis, an automated IAM/S3 security scanner that evaluated 100+ demo workloads weekly, detecting 15-20 misconfigurations monthly and preventing potential security incidents.
- Created reusable Terraform modules for VPC, IAM, networking, and monitoring, enabling deployment of 5+ isolated cloud environments per month for training and demos.
- Implemented CloudWatch dashboards, alarms, and metric filters, increasing monitoring coverage to ~95% of active infrastructure and reducing alert-to-response time by 100%.
- Handled on-demand troubleshooting for EC2, VPC, IAM, S3, networking, and access issues, resolving an average of 15-20 tickets/week with detailed root cause analyses (RCA) and follow-up remediation.

Parliament of Kenya - Parliamentary Joint Services ☑, Technical & User Support Engineer 01/2023 – 10/2024 | Nairobi, Kenya

- Maintained 99% uptime across ~50 workstations and critical services in high-profile government offices, ensuring near-zero downtime over 12 months.
- Automated routine IT-support and reporting workflows, reducing manual task effort by 100%, saving approximately 120 staff-hours/month.
- Designed and deployed a self-service digital knowledge base, leading to a 25% reduction in repeat support tickets and accelerating first-response resolution by ~30%.
- Provided cross-department system, network, and endpoint support servicing ~200 users and managing ~100 support tickets/month on average.

EDUCATION

Cloud & Network Security Program (Specialization Track), 08/2025 – 12/2025 | Nairobi, Kenya
United States International University - Africa
Cyber Shujaa | USIU

Associate Degree in Information & Communication Technology (ICT), 01/2022 – 11/2024 | Nairobi, Kenya
The Nairobi National Polytechnic (TNNP), Kenya ☑

SKILLS

Languages & Scripting: Bash, Python, HCL, SQL, JavaScript.

Cloud & Infrastructure: AWS (EC2, EKS, Lambda, VPC, IAM, S3, RDS), OCI, foundational GCP & Azure.

DevOps / IaC / CI-CD: Terraform, GitHub Actions, Docker, Kubernetes (EKS), Serverless, CloudWatch, monitoring/alerts.

Security & Compliance: IAM/RBAC, KMS, Secrets Management, network/security hardening, access audits.

Systems & Administration: Linux & Windows administration, server configuration, endpoint management, and troubleshooting.

Soft / Operational: Automation design, monitoring & incident response, documentation, root-cause analysis, collaboration.

Systems & End-User Support: endpoint setup and troubleshooting, hardware and peripheral support, Active Directory

Networking & Connectivity: TCP/IP fundamentals, DNS, DHCP, and VPC-level networking | VPN, LAN, and connectivity issue troubleshooting | Network-related incident diagnosis and escalation

PROJECTS

Project Aegis - Cloud Security Automation, IAM + S3 posture checker; scans for over-permissive roles, public buckets, missing encryption, un-rotated keys; runs weekly across all environments; logged 15+ potential security issues in first 3 months. 04/2025 – 05/2025

AWS Auto-Troubleshooter (Serverless Automation), Serverless diagnostics using Lambda + CloudWatch + SNS; automatically detects CPU spikes, IAM access failures, S3 errors; sends structured alerts to on-call engineers; supports 24/7 monitoring of critical workloads. 03/2025 – 05/2025

Bunge Library - Digital library Repository ☑, Digital archive for document storage, indexing, and retrieval; improved access speed for documents by ~60% and enabled secure long-term storage with version control and metadata indexing. 02/2023 – 04/2025

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate: 05 May 2025
- Oracle Cloud Infrastructure 2025 Certified Multi-cloud Architect Professional: 31 October 2025
- Workflow specialist: Issued November 17, 2025
- PrivacyOps Certificate : Issued December 1, 2025
- AI for work | AI Security & Governance Certified | Generative AI Fundamentals - Issued December 1. 2025

INVOLVEMENT

- AWS Internship Cohort**, Member 02/2025 – Present | Nairobi,Kenya
Architected reusable automation templates for cloud troubleshooting and security enforcement, standardizing best practices and accelerating resolution workflows across engineering teams
- Google Developer Groups (GDG)**, Member 01/2025 – Present | Nairobi,Kenya
Contributed to cloud and DevOps workshops by sharing automation best practices, demonstrating multi-cloud deployment strategies, and collaborating on hands-on projects to drive peer learning and stay at the forefront of industry trends.
