

Imani Omboto
Generative Artificial Intelligence Developer and Prompt Engineer

Personal email: ombotoimani@gmail.com

Professional profile

Ambitious, multicultural and multi functional Generative Artificial Intelligence Developer with 2 years of experience in Artificial Intelligence, mobile/web development, and enterprise innovation. A fast adaptor and learner, skilled in leveraging agile methodologies, design thinking, and data-driven solutions to optimise operations, streamline processes, and drive value creation. Globally oriented, having studied and worked in Kenya, Tanzania, and Germany, with a proven ability to collaborate across diverse teams and deliver measurable business outcomes.

Core skills

Technical skills

Generative Artificial Intelligence:

- Large Language Models (LLMs) engineering.
- Prompt design, optimization, and evaluation.
- Retrieval-Augmented Generation (RAG) pipelines.
- Fine-tuning and task-specific instruction tuning.
- AI safety, alignment, and compliance practices for enterprise use.
- Model monitoring, degradation management, and red-teaming prompts.
- NLP model integration (LLMs, retrieval systems, vector databases).
- Semantic search, embeddings, and document retrieval pipelines.
- Text generation quality control: factual grounding, tone, length, and style.
- Data preprocessing for training/inference pipelinesModel deployment and orchestration on cloud platforms.

Prompt Engineering:

- Prompt crafting for business enablement, support, and knowledge work.
- Multi-turn dialogue design and persona management.
- Channel-aware prompt generation.
- Evaluation frameworks: automated metrics and human-in-the-loop feedback.
- Prompt libraries, templates, and modular composition.

Python programming:

Web Frameworks & APIs

- Flask, Fast API: Building RESTful APIs, micro-services, and server-side templating.
- Middle-ware & Extensions: Handling authentication, session management, and request validation.

Concurrency & Performance

- UV: Implementing asynchronous I/O, event loops, and concurrency models for high-performance applications.
- Multi-threading/Multiprocessing: Optimising CPU-bound tasks, parallelizing workloads when appropriate.

Artificial Intelligence Integration

- Model Deployment: Serving models (Large Language Models, Retrieval Augmented Generation based solutions) in production environments on SAP BTP's SAP AI Core and SAP AI Launchpad.

- Data Processing: Reading, cleaning, and transforming large datasets, using Python and its native loaders

Environment & Dependency Management

- Virtualenv, Pipenv, or Poetry: Isolating project dependencies for consistent builds.
- Docker + Python: Creating container images for uniform deployment across dev, staging, and production.
- Linux/WSL: Streamlined local development and testing, bridging Windows and Linux workflows.

Testing & Debugging

- Unit & Integration Tests: Using pytest or unittest to ensure stable codebases and catch regressions early.
- Breakpoint Debugging & Logging: Employing interactive terminals, logs, and environment variables for quick issue resolution.

Code Quality & Architecture

- PEP 8 Compliance: Adhering to Python style guides for readability and maintenance.
- Design Patterns: Dependency Inversion & Injection, modularization for scalable, easily testable structures.

Build & Release Pipelines

- Git & GitHub: Establishing CI/CD workflows (GitHub Actions, Jenkins) for automated testing and deployments.
- Registry & Versioning: Using svcvs or container registries to track image updates, enabling reproducible builds and rollbacks.

Javascript Programming

ES6+ Proficiency

- Leveraging modern features (arrow functions, async/await, destructuring) for clean, efficient code.

React (Frontend)

- Building interactive UIs in React (including React UI5 for enterprise SAP solutions); using component-driven architecture, hooks, and state management.

Node.js (Backend)

- Implementing RESTful APIs and handles asynchronous tasks (promises, callbacks) for scalable server-side applications.

SQL

Relational Databases

- MySQL and SAP SQL with knowledge of schema design, indexing, and normalisation.

Transaction Management

- Ensuring data integrity via ACID properties (atomic, consistency, isolation, durability).

Version control and Registry

- *Git & GitHub*: Branching strategies (GitFlow), pull requests, code reviews, and issue tracking for collaborative development.
- *svcvs (Service Registry)*: Managing container images, versions, and rollbacks, enabling reproducible and traceable deployments.

Methodologies

- *UML Modeling*: Documenting requirements, flows, and interactions via use-case, sequence, and activity diagrams.
- *Agile/Scrum*: Sprint planning, daily stand-ups, retrospectives, and backlog management.
- *Design Thinking*: User empathy, iterative prototyping, and continuous feedback for innovative product development.
- *Lean Startup*: Rapid experimentation, pivot-or-persevere mentalities, and validated learning loops.

- *Six Sigma & TQM*: Quality improvement strategies and data-driven optimization for processes and products.

HTML and CSS

- **HTML5 Semantics**: Utilizing semantic tags (<header>, <section>, <article>) for accessibility and SEO.
- **CSS3**: Proficient in layouts (Flexbox, Grid), animations (transitions, keyframes), and responsive design patterns (media queries).
- **Cross-Browser Compatibility**: Testing pages on Chrome, Firefox, Safari, Edge to ensure consistent rendering.

DevOps and Infrastructure

- **Docker & Containerization**: Building and running microservices in isolated containers; Docker Compose for multi-container apps.
- **Nginx & Load Balancing**: Configuring reverse proxies, SSL, and load balancers for high-traffic services.
- **CI/CD Pipelines**: Automated builds, tests, and deployments with GitHub Actions, Jenkins, or similar tools.
- **Linux/WSL**: Deploying and troubleshooting in Unix-like environments (Ubuntu) while bridging Windows workflows with WSL.
- **Cloud Platforms**: Familiarity with SAP BTP and AWS for scalable, on-demand infrastructure.

Design patterns and Architectures

- **Dependency Inversion & Injection**: Maintaining modular and testable code, simplifying mock/fake usage in unit tests.
- **UML Diagrams**: Creating class diagrams, sequence diagrams, and use-case diagrams to model system behavior and design.

Business and Innovation skills

Product Strategy & New Product Development

- Requirements gathering, market research, and product roadmapping
- MVP planning and iterative feature rollouts

Investor Profiling & Market Validation

- Evaluating investor fit based on risk tolerance, track record
- Conducting lean experiments to validate product-market alignment

Strategic Thinking & Change Management

- Identifying organizational needs, aligning stakeholders, and driving innovation
- Managing adoption of new technologies with minimal disruption

Soft skills

Strategic Cross-cultural Communication & Collaboration

- Adapting to diverse work environments, remote teams, and international stakeholders
- Emphasizing inclusivity and open dialogue

Multi functional Adaptability

- Skilled at transitioning between coding tasks, project management, and stakeholder communication

- Comfortable bridging technical, business, and creative processes across product development cycles

Multi Multilingual Proficiency

- Fluent English; proficient reading, speaking, and writing in German (A2 level)
- Enhances global teamwork and reduces language barriers in international settings

Research & Documentation

- Drafting comprehensive technical and business documentation
- Presenting complex topics in a structured, audience-friendly format

Problem Solving & Critical Thinking

- Analytical approach to debugging and system optimization
- Data-driven decision-making for quick, effective solutions

Leadership & Team Coordination

- Facilitating cross-functional collaboration, conflict resolution, and goal alignment

EDUCATION

▪ **Master of Science in Embedded & Mobile Science** (Mobile Specializations)

Nelson Mandela African Institute of Science & Technology, Arusha, Tanzania (Jun 2023 – Jun 2025)

▪ **Bachelor of Science in Business Innovation Technology Management**

Jomo Kenyatta University of Agriculture & Technology, Kenya (Aug 2018 – Jun 2022)

Certifications

- **Certificate in Generative Artificial Intelligence**, Johns Hopkins University, (Mar 2025)
- **German Language & Cultural Summer School**, Technische Universität Braunschweig, Germany (Jun – Jul 2024)
- **Enterprise Design Thinking Co-Creator**, IBM (Mar 2023)
- **Enterprise Design Thinking Practitioner**, IBM (Feb 2023)
- **Certificate in Software Engineering**, ALX Africa, Nairobi, Kenya (Feb 2022 – Mar 2023)
- **Proficiency in German Language**, Level A1 & A2, Goethe Institute, Nairobi, Kenya (Jan - Aug 2018)
- **Basic Engineering in Draughtsmanship**, Citech, westlands, Kenya (Jan - Aug 2018)

WORK EXPERIENCE

Backend Artificial Intelligence Developer, Global Careers Africa(GCA), Nairobi,, Kenya – August 2025 - Present

- Generative Artificial Intelligence system development

Artificial Intelligence Developer Intern, abat AG, Bremen, Germany – October 2024 -

March 2025

- Implemented a Large Language Model (LLM) enhanced application with retrieval augmented generation (RAG) on SAP BTP, delivering a robust proof of concept for production-level AI solutions.
- Streamlined dependency injection and environment management, improving maintainability and reducing downtime by 25%.
- Debugged complex integration issues using interactive terminals and breakpoints, accelerating prototype iterations by 30%.
- **Technologies:** SAP BTP, SAP AI Core, SAP HANA Cloud Vector Engine, Python, React (UI5), LazyGit, Docker, SAP AI Launchpad

Innovation and Design Fellow, Circle Innovation, Nairobi, Kenya – April 2023 - June 2023

- Designed a leadership curriculum for Youth Advisory Committee members of the DREEM project by Mastercard Foundation & WUSC, increasing program completion rates by 15%.
- Facilitated human-centered design workshops, enabling participants to discover innovative solutions and document key insights, increased participant satisfaction scores by 15% through interactive sessions and real-time feedback loops.
- Conducted competitor analyses and investor profiling for startup founders, compiling data on 20+ potential investors.
- Provided lean startup sprints and market validation, enabling 5+ female entrepreneurs to reduce iteration time by 40%.
- Social Media Management: Strategically created, scheduled, and monitored cross-channel content to enhance brand visibility and engagement.

Innovation Management & ICT support Intern, Sanlam HQ, Westlands, Kenya – February 2021 - May 2021

- M-PESA Onboarding Strategy: Formulated a direct integration plan, cutting onboarding costs and streamlining customer sign-ups.
- Innovation Portfolio: Pitched forward-looking partnership ideas and innovative concepts, one of which was officially adopted by Sanlam.
- Customer Roadmapping: Collaborated with the Customer Relations department to design a tracking tool, improving feedback management.
- ICT Support: Resolved 50+ weekly technical issues (laptops, software updates, cybersecurity) for staff at all levels, enhancing overall system uptime, Completed IT

onboarding for over 10 employees per week and Managed inventory for ICT department encompassing about 200 devices and 100 users

Publications

SAP Academic Community Conference (Sep 2024)

Presented and published a review paper titled “Integrating Big Data Analytics with Enterprise Resource Planning for Sustainable Business Practice” in Vienna, Austria.

- Demonstrated how data-driven insights and ERP systems can optimize resource usage, reduce costs, and improve sustainable operations in modern enterprises.
- Garnered interest from industry professionals and SAP experts, sparking collaborative discussions on integrating big data solutions to achieve greater efficiency and environmental responsibility in business practices.

Memberships

- ALX The Room
- ALX Applied Artificial Intelligence

Language skills proficiency

English – Proficient

Kiswahili - Proficient

German - Level A1 and A2 Proficient

Volunteering & Extracurricular

Mentorship, Gatumaini Primary School (2020)

- Provided technology and career guidance to ~30 students, encouraging early STEM engagement.

Girls for Girls Alumni & Presidential Award (Bronze & Silver)

- Participated in leadership and community-development initiatives.

Campus to Boardroom Mentor Group

- Held virtual events to enhance education-to-employment discussions with influential, well-established individuals in the business industry. Also designed promotional posters for the initiative.

Leadership and Outreach

Class Representative, Nelson Mandela African Institute of Science & Technology (June 2023 – June 2025)

- Organized and led a technology outreach initiative at Ng'anana and Nambala Primary Schools in Arusha, Tanzania.

- Planned and coordinated outreach activities to raise technology awareness among students in remote schools with limited resources.
- Engaged primary students in interactive sessions, introducing them to fundamental tech concepts and tools.

Hobbies

Travelling, Listening to podcasts, sightseeing, hiking, arts and crafts, Ideation and Prototyping
