SUMMARY

AI & Machine Learning Engineer with hands-on experience in designing and deploying intelligent systems that drive efficiency and automation in business processes. Skilled in building production-ready ML pipelines, integrating large language models (LLMs), and developing backend APIs using Python and Node.js. Passionate about applying AI to real-world problems — from predictive modeling to NLP-driven automation — and delivering scalable, high-impact solutions.

SKILLS

- Programming & Frameworks: Python (Pandas, NumPy, TensorFlow, PyTorch, LangChain), Node.js, SQL
- AI/ML Expertise: Model design, training & deployment, NLP, LLM integration, data pipelines
- Backend Development: RESTful APIs, server-side logic, automation scripting
- Cloud & DevOps: AWS, GCP (data storage, compute & model hosting)
- Visualization & Analytics: Matplotlib, Seaborn, Tableau
- Collaboration & Tools: Git, Docker, Streamlit, Firebase, Jira, Slack
- Soft Skills: Problem-solving, cross-functional collaboration, facilitation, adaptability

Projects

- ESS Adverse Media AI Tool (2024–2025)**
 - Designed and deployed a multi-API AI screening tool powered by LLMs to identify supplier risk using NLP, translation, and sentiment analysis.
 - Implemented automated email alerts, real-time dashboards, and false-positive filtering with contextual risk scoring.
 - Tools: Python, OpenAI API, NewsData.io, LangChain, Streamlit, PostgreSQL
- Denied Parties Database (2023)**
 - Developed a searchable database to automate compliance screening using data from global regulatory sources.
 - Integrated predictive filters and optimized query logic for efficiency.
 - Tools: Python, SQL, AWS RDS
- Power Energies App (2023–2024)**
 - Led AI feature design for a full-stack mobile application that tracks transactions and predicts resource utilization.
 - Integrated Firebase ML and automated data-driven insights.
 - Tools: Kotlin, Firebase, Python API
- Hate Speech Detector (2022)**
 - Built and deployed a text-classification model to detect hate speech and misinformation using supervised learning and NLP.
 - Tools: Python, Scikit-learn, TensorFlow, Flask API

EXPERIENCE

AI Integration Specialist | Assent

Jan 2025 - Present | Kenya

- Lead AI integration for CX automation using Python, SQL, and visualization tools.
- Deploy GenAI solutions and manage NLP/ML pipelines.
- Worked closely with some of the top customers to review their implementation setups, data corruptions and provided solutions specific to customer requirements.
- Worked on quarterly projects that involved major application enhancements and upgrades.
- Design and deploy AI/ML models and GenAI systems for compliance automation.
- Build and maintain Python-based ML pipelines for risk detection and NLP-driven insights.
- Collaborate with engineering teams to embed AI models into production workflows.
- Conduct model fine-tuning, evaluation, and performance monitoring for efficiency.

Key Accomplishments: Developed ESS Adverse Media AI tool that supports supplier screening.

Research & Data Specialist | Assent

Jan 2018 - Dec 2024 | Kenya

- Built and maintained the **Denied Parties Database** used for automated screening.
- Monitored adverse media, generated reports, and ensured data quality in Salesforce.
- Analyzed different alternatives to migrate AWS RDS DB Snapshots.
- Conducted testing & validation to ensure web pages conform to government regulations and policy
- Designed data-driven systems for compliance and risk intelligence.
- Managed adverse media data collection, cleaning, and reporting in Salesforce and AWS.
- Conducted research and testing to ensure compliance with global data standards.

Key Accomplishments: Developed Denied Parties Database

Project Coordinator | The Sentinel Project

May 2022 - Nov 2022 | Kenya

- Contributed in development and implementation of Misinformation System.
- Managed misinformation system
- Trained volunteers
- Coordinated public campaigns
- Oversaw project budgets.

Key Accomplishments: Development and implementation of Misinformation System

Field Supervisor | Digital Opportunity Trust - Kenya

Jan 2020- July 2022 | Kenya

- Oversaw Daring to Shift program delivery
- Mentored Community Leaders
- Supported participant empowerment.

EDUCATION

Moringa School Associate Certificate in Data Science	May. 2025
ALX Kenya Associate Certificate AI Fundamentals	June. 2024
Coach Africa Associate Certificate in Coaching	May. 2021
University of Eldoret Bachelor of Science in Computer Science • Second class upper	Nov. 2015

Volunteer Experience

-
- **Chairman University of Eldoret Web Club:** I was in charge of leading the club through planning, organizing and coordinating trainings on software and web development
