SOFTWARE DEVELOPER

Full-Stack Developer specializing in **React.js and Angular (Frontend) + Ruby on Rails (Backend)**. Passionate about building scalable web apps with clean, maintainable code. Strong problem-solving skills and a collaborative mindset. Fast learner with a problem-solving mindset, eager to contribute to **high-performance teams** by tackling complex challenges and delivering **user-centric solutions**.

Technical Skills

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind, Redux, Vite, Material UI

Backend: Ruby on Rails, Python, RESTful APIs, PostgreSQL, MySQL

Tools: Git, Docker, AWS (EC2, S3), Jest, Postman

Concepts: MVC, Agile/Scrum, CI/CD

Professional Experience

Software Developer

Freelance

Oct 2024 – Present

Nairobi, Kenya.

- Developed custom software solutions for clients using React, Tailwind, Ruby on Rails, PostgreSQL and JavaScript.
- Developed and maintained a client's dashboard using React.js + Ruby on Rails and Tailwind, improving user engagement by 30%.
- Fixed 50+ bugs in legacy code, improving system stability and performance for a client's Ticketing system.
- Deployed Static website on AWS S3.

Front-end Developer Trainee

WTF Fellow

Oct 2023 – Nov 2024

Remote

- Developed an interactive layout using HTML, CSS and JavaScript while leveraging React to generate an improved user experience, ensuring high-quality design and cross-browser compatibility.
- Developed add-to-cart e-commerce application using Restful API utilizing HTML, CSS JavaScript React and M-Pesa Daraja API Integration incorporating features like Cart listing, search functionality and user authentication.
- Spearheaded debugging efforts to eliminate cross-browser issues, helped improve application functionality, and increased performance by optimizing page elements for faster loading times.
- Participating in online coding challenges and hackathons to expand knowledge and collaborate with peers in the developer community as part of Continuous learning.

During this period, I got to work with two organizations courtesy of ICT Authority, **Milimani Law Courts** and **Impax Business Solutions**.

- Provided technical assistance in the implementation, customization and support of Microsoft D365 Finance and Operations & AX 2012.
- Developed and maintained technical documentation, including design documents, system configurations and technical specifications.
- Participating in system testing and user acceptance testing (UAT) to ensure that the system is working as intended.
- Customizing Systems using M365 tools for Finance & Operations & AX 2012, SSRS for Reporting and Microsoft SQL for Databases.
- Worked with a team of developers to improve on the Case tracking system for the Judiciary of Kenya.

Projects

Helpdesk Ticketing System (React + Rails) | [GitHub](#)

- Role-based dashboard for ticket management (**admin, agent, user roles**).
- Used **Rails API** for backend logic and **React hooks** for dynamic UI.
- Built RESTful APIs in Rails to support frontend functionality, reducing latency by 25% through query optimization.
- Integrated JWT authentication for secure user sessions and implemented Redux for state management.

Personal Portfolio Project (React) | [GitHub](#) | [Live Demo](#)

- Contains portfolio section that shows my previous projects
- Contains a contact section powered by formspree.

Education & Certifications

AWS Cloud Practitioner

Cloud and Network Security

Software Development (Front-end)

Bachelor's Degree in Computer Science,

AWS

CyberShujaa
