Professional Summary

Software engineering trainee with a foundation in backend development, SQL scripting, and solution configuration, complemented by five years of structured experience in project management and BIM coordination. Recently completed a 12-month Software Engineering Programme (Backend specialization), gaining hands-on experience in APIs, database design, and Agile workflows. Skilled at analyzing business requirements, configuring systems to client specifications, and producing both technical and user documentation. Strong communicator with proven ability to deliver customer-focused solutions, manage projects, and present to stakeholders.

Core Skills & Tools

- Software & Development: SQL (Oracle, SQL Server), JavaScript, REST APIs, Git, Backend Development
- Configuration & Documentation: Business requirements review, solution testing, end-user documentation, technical reports
- Report Development: Crystal Reports, SSRS (beginner)
- Project Methods: Agile & Waterfall, JIRA, MS Project
- Other Technical Skills: BIM (Revit, AutoCAD, Navisworks), Adobe Suite (Photoshop, InDesign, Illustrator)
- Soft Skills: Communication, presentation, stakeholder engagement, problem solving

Professional Experience

Results Japan Kenya — Nairobi

Head of Grants & Business Development (Mid-2024 – Present)

- Spearheaded grant acquisition and partnership strategy, securing over USD 2M in new funding.
- Designed and managed donor-funded digital solutions for project tracking, improving reporting efficiency by 30%.
- Coordinated requirements gathering and produced both technical and end-user documentation for new systems.

BIM Coordinator (2024 – Mid-2024)

- Configured and tested BIM solutions, aligning with both donor and local standards.
- Developed BIM execution plans that reduced design errors by 15% and streamlined contractor coordination.
- Trained 10+ team members in transitioning from CAD to BIM systems.

Project Manager (PPP Construction Projects) (2019 – 2021)

- Delivered 38 public sanitation facilities across Westlands Sub-County under donor-funded programs.
- Managed design and construction of an ultramodern medical laboratory and multipurpose hall at Kangemi Health Centre.
- Produced technical reports, feasibility studies, and compliance documentation to meet donor requirements.

Questworks Ltd — Nairobi

Project Manager / BIM Coordinator (2021 – 2023)

- Managed solar energy control centre project in Uasin Gishu (55 MWp), integrating with Kenya Power grid.
- Coordinated design and documentation for Origen Fresh avocado oil factory at EPZ Athi River.
- Developed SQL-based cost tracking tools and digital reporting templates to improve project oversight.
- Delivered educational and commercial projects including Strathmore ECT Centre and Hodari Hostels.

Education & Training

- Software Engineering Programme (Backend Specialization) — 12 months, 2023–2024
Focused on backend development, APIs, SQL scripting, Agile/Waterfall methodologies.
- The Technical University of Kenya — B.BE in Construction Management, 2014–2019
Graduate Project: Feasibility and design of a CBC-compliant elementary school in South B, Nairobi.
- St. Mary's School Yala — KCSE, B+ (73/84 Points), 2009–2013

Certifications & Memberships

- Graduate Member, Association of Construction Managers of Kenya (ACMK), 2017–Present
- IFC World Bank EDGE Workshop – Green Building (2022)
- FIDIC Contracts Training (2020)
- ACMK CPD Workshops (2019–2023)

Additional Information

- Languages: Fluent in English
- Driving License: Full, Clean
- Interests: Coding projects, painting, creative writing, video editing
