PROFESSIONAL SUMMARY

Versatile and forward-thinking Software Engineer and AI Specialist with over 4 years of professional experience designing, analyzing, and maintaining intelligent systems and scalable software solutions. Highly skilled in full-stack web development using modern frameworks such as **Node.js, Next.js, React, FastAPI, Ruby on Rails, and Express**, with proven ability to integrate **Large Language Models (LLMs)** via API, automate workflows, and build intelligent applications.

Possesses deep technical insight in **computer system analysis, maintenance, and repair**, and a strong background in **software curriculum design** and instruction. Actively pursuing a **Master of Science in Artificial Intelligence** at the **Open University of Kenya**, with ongoing work in **MCP protocol design**, AI systems engineering, and advanced API integration.

Recognized for innovation in software development through multiple **Pwani Innovation Week Hackathon wins (2023, 2024)**.

CORE SKILLS

- **Programming & Frameworks:** Python (Django, Flask, FastAPI), JavaScript (React, Node.js, Express, Next.js), Ruby (Rails), Rust
- **AI & Intelligent Systems:** LLM integration (OpenAI, HuggingFace), chatbot development, AI-powered APIs, NLP pipelines
- **System Engineering:** MCP protocol design, system analysis, software testing, hardware diagnostics and maintenance
- **Databases & Tools:** PostgreSQL, MySQL, MongoDB, Git, Docker, VS Code, Linux

- **Cloud & APIs:** Azure (Fundamentals), Microsoft Graph API, RESTful API architecture
 - **Software Design:** Curriculum design, pedagogical planning, instructional content development
 - **Security:** Firewall configuration, secure coding, vulnerability assessments, system hardening
 - **Soft Skills:** Cross-functional collaboration, mentoring, project management, growth mindset
-

PROFESSIONAL EXPERIENCE

Software Engineer & Curriculum Designer

Elimu Resource Centre, Mombasa, Kenya • *June 2024 – Present*

- Designed and delivered ICT and AI curriculum content for youth training programs across Kilifi County.
- Built and deployed intelligent systems integrating LLM APIs for learning platforms and automation workflows.
- Maintained high-performance systems through structured hardware diagnostics and preventative maintenance.
- Mentored junior developers and trainers, emphasizing curriculum alignment with emerging technologies and job market trends.

Software Developer

JILk Construction Limited, Mombasa, Kenya • *January 2023 – June 2024*

- Developed RESTful APIs with Flask, FastAPI, and Express to digitize operations and reduce manual workflows.
- Refactored backend systems for enhanced security and scalability using PostgreSQL and Dockerized environments.

- Delivered real-time dashboards using React and Next.js to improve executive decision-making processes.

Data Annotation Specialist (Freelancer)

Remotask • *January 2022 – Present*

- Labeled datasets for training computer vision and NLP models, focusing on accuracy, class balance, and annotation guidelines.
- Collaborated with AI engineers to optimize pipeline tools and reduce latency in feedback loops.

Intern, Software Development

Swahilipot Hub, Mombasa, Kenya • *January 2022 – April 2022*

- Developed internal tools and APIs for resource scheduling and client engagement.
- Deployed Python-based applications with integrated third-party APIs for community projects.

Intern, ICT Support

County Government of Mombasa, Kenya • *January 2021 – April 2021*

- Performed hardware maintenance and software diagnostics for 50+ government machines.
- Assisted in LAN/WAN configuration, user training, and network performance analysis.

EDUCATION

Master of Science in Artificial Intelligence (*In Progress*)

Open University of Kenya • Enrolled 2025

Bachelor of Science in Electrical and Electronics Engineering

Technical University of Mombasa • Graduated July 2022

- *Relevant Coursework:* Data Structures, AI Fundamentals, System Design, Networking
- Distributed control system, wiring design , machine maintenance skills.deep Numerical skills set

Software Engineering Bootcamp
Moringa School • Completed 2022

Web Development Course
Emobilis • Completed via Capstone Submission

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (2024)
 - Cisco Networking Certification – Linux OS and Python
 - Power Learn Project – Software Development
 - Internal Training: MCP Protocol Design and Implementation
-

PROJECTS

Intelligent Microsoft Graph API Toolkit

- Built a Python + FastAPI solution integrating LLMs for onboarding automation and intelligent query construction.
- Implemented structured logging and exception handling for debugging edge cases.
- GitHub: <https://github.com/ogola5/marketing-app>

Hackathon-Winning Task Manager App – *Pwani Innovation Week 2023*

- Developed with React + Django backend and PostgreSQL for real-time collaborative task tracking.

- Featured real-time notifications, user roles, and responsive dashboards.

AI Chatbot with OpenAI API Integration

- Designed and deployed a full-stack AI chatbot using OpenAI's GPT API, React frontend, Node.js backend.
 - Features include session persistence, intelligent routing, and prompt engineering logic.
-

ACHIEVEMENTS

- **Pwani Innovation Week Hackathon Winner** (2023, 2024): Recognized for innovative AI- and API-driven applications
 - Developed and deployed secure, high-traffic APIs serving over 10,000 users
 - Designed and tested MCP protocol prototype for distributed system coordination
-

ADDITIONAL INFORMATION

- **Languages:** English (Fluent), Swahili (Fluent)
 - **Clearance:** Eligible for Microsoft Cloud Background Check
-
