Dear Hiring Manager,

I am writing to express my interest in the IT Support Consultant position. I have recently submitted my application and would like to highlight my strong background in Information and Communication Technology, along with my hands-on experience in technical support and system troubleshooting.

I am currently completing my Diploma in ICT at Thika Institute of Business Studies and have developed practical skills in operating systems, networking, and software support. I have experience installing and configuring systems, troubleshooting hardware and software issues, and assisting users in resolving technical challenges efficiently.

In my previous role as a Supervisor at Central Supermarket, I provided technical support for POS systems, assisted in resolving network and connectivity issues, and supported staff with system-related challenges. This experience strengthened my problem-solving abilities and my capacity to communicate technical solutions clearly to users.

Additionally, I have worked on projects such as developing a Library Management System and building business websites, which have further enhanced my technical and analytical skills.

I am eager to contribute my skills, grow professionally, and support your organization in maintaining efficient and reliable IT systems. I would welcome the opportunity to discuss how I can add value to your team.

Thank you for your time and consideration.

Kind regards,

Lewis Ngunjiri.
