PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer and Project Manager with 8+ years of experience delivering enterprise-grade solutions in fintech, eKYC, and property management. Recognised Source Control Owner and CI/CD champion established Git branching strategies, Azure DevOps pipelines, and automated testing frameworks that cut deployment errors by 20% and release cycles by 40–50%. Experienced in designing Microservices architectures and Docker/container orchestration. Led a development team for 2+ years at Tovuti Group, driving sprint planning, backlog grooming, and Agile delivery. Expert in .NET (Core, MVC, MAUI), C#, React, and Azure. Consistently delivers 100% client satisfaction on enterprise projects.

CORE COMPETENCIES

CI/CD Pipeline Architecture	Source Control Management (Git/Azure DevOps)	Microservices & Docker Orchestration
Full Stack Development (.NET, React, MAUI)	Cloud Solutions (Azure)	Team Leadership & Sprint Planning
Agile/Scrum Delivery	API & System Design	Biometric & eKYC Integration
DevOps Automation	System Performance Optimisation	Client Engagement

TECHNICAL SKILLS

Languages & Frameworks	C#, ASP.NET Core/MVC, .NET MAUI, React.js, JavaScript, Kotlin
Databases	SQL Server, MySQL, Azure SQL
Cloud & DevOps	Azure Functions, App Services, Azure DevOps Pipelines, CI/CD Automation, Docker, Container Orchestration
Source Control	Git, Azure DevOps Repos , branch policies, PR reviews, merge strategies, GitFlow, release tagging
Architecture	Microservices, REST APIs, MVC, MVVM, Event-Driven Design
Tools	DevExpress, Rotativa, iTextSharp, Swagger, Postman
Practices	Agile/Scrum, Sprint Planning, TDD, Integration Testing, Code Review, CI/CD

PROFESSIONAL EXPERIENCE

Software Developer – eKYC & Border Control Solutions

Value Chain Factory/Nairobi, Kenya

- Lead developer for national eKYC and border-control platforms integrating passport and biometric scanners (C#, C++).
- Designed inter-agency REST APIs enabling secure data validation across ministries, processing 100K+ identity checks monthly.
- Implemented WebSocket-based biometric streaming, improving system reliability by 35%.
- Collaborated with government and healthcare partners to ensure compliance with national digital-ID standards.
- Resolved production bugs pre-deployment, reducing post-release defect rates and improving software efficiency.

06/2025 – Present

- Modernised legacy codebases to current .NET standards, improving maintainability and performance.
- Developed software for both desktop and mobile operating systems.

Full Stack Software Developer

01/2024 – 05/2025

Uttamb Solutions Limited/Nairobi, Kenya

- CI/CD Owner: Designed and owned Azure DevOps pipelines, automated build/test/deploy workflows, and enforced Git branching strategies across all projects.
- Source Control Lead: Administered the Git repository structure, defined merge policies, conducted PR reviews, and maintained release versioning.
- Architected and launched a multi-platform Property Management System (.NET Core + React), automating workflows and increasing listings by 25%.
- Built a .NET MAUI cross-platform mobile app reducing manual house-hunting effort by 80%.
- Integrated biometric scanners (Sinosecu, SecuGen) into healthcare eKYC modules, ensuring regulatory compliance.
- Optimised SQL queries and automated report generation, improving backend throughput by 35%.
- Delivered CI/CD-ready release packages with automated unit and integration tests, cutting deployment cycle time by 40%.
- Maintained clean Git history via enforced branching policies (feature/develop/main), enabling zero-downtime deployments.
- Conducted rigorous code reviews, maintaining high code quality and consistency across the project lifecycle.

Senior Software Developer/Project Manager

07/2021 – 12/2023

Tovuti Group Limited/Nairobi, Kenya

- CI/CD Architect: Designed, implemented and owned all Azure DevOps CI/CD pipelines - establishing automated build, test, and deployment workflows adopted company-wide.
- Source Control Owner: Defined Git branching strategy (GitFlow), enforced branch protection rules, managed release tagging, and led all PR reviews for a team of 10+ engineers.
- Team Lead (2 Years): Directly led a team of 10+ engineers - ran sprint planning, backlog grooming, daily stand-ups, retrospectives, and sprint reviews under Agile/Scrum.
- Microservices & Docker: Architected and migrated key services to a Microservices model, containerised workloads using Docker, and managed container orchestration for scalable deployments.
- Led 5+ concurrent enterprise projects (Fuel Card, Fleet Management, POS) with 100% on-time delivery and full client satisfaction.
- Team Lead for 2 years: Ran sprint planning, backlog grooming, daily stand-ups, and retrospectives for a cross-functional team of 10+ engineers, improving sprint velocity by 35%.
- Revamped Fuel Card System, boosting transaction throughput by 40% and sustaining 99.9% uptime SLA.
- Delivered Fuel Management App (.NET MAUI + ASP.NET Core) automating 70% of fuel station operations, increasing revenue by 2.5% in 5 months.
- Implemented CI/CD pipelines in Azure DevOps, cutting deployment errors by 20% and eliminating manual release steps.
- Architected Microservices decomposition of monolithic systems; containerised services with Docker and managed orchestration for high-availability deployments.
- Automated financial reporting via DevExpress, reducing manual preparation time by 50%.
- Mentored junior developers on Git best practices, CI/CD workflows, Docker, and clean-code principles.

Mid-Level Software Developer

08/2019 – 06/2021

Tovuti Group Limited/Nairobi, Kenya

- Developed and maintained ASP.NET Core backend APIs with Azure SQL, sustaining 99% uptime.
- Designed legacy Fuel Card System and led migration to a scalable, multi-tenant Azure cloud architecture, cutting infrastructure costs by 25%.

- Contributed to early Microservices planning and Docker containerisation initiatives ahead of full rollout.
- Built analytics dashboards improving transaction visibility and executive reporting efficiency.
- Migrated on-premise monolithic applications to Azure App Services and Azure Functions.
- Contributed to CI/CD adoption by scripting deployment automation ahead of full pipeline rollout.

Mid-Level Software Developer

01/2019 – 07/2019

BMAT Solutions/Nairobi, Kenya

- Generated automated financial reports for banking and SACCO systems, improving insight delivery speed by 45%.
- Automated financial reporting workflows, reducing manual data handling by 40%.
- Supported deployment and performance tuning for enterprise financial systems.
- Streamlined development using reusable code libraries across multiple client projects.

Junior Software Developer

06/2018 – 12/2018

BMAT Solutions/Nairobi, Kenya

- Developed Pesapap (M-PESA Integration System) automating digital payment workflows.
- Built Mobile Management System and Umwalimu Customer Management tools, improving service response time by 25%.
- Integrated Panini cheque scanner for accurate financial processing, reducing errors by 30%.

Software Developer Intern

09/2017 – 05/2018

BMAT Solutions/Nairobi, Kenya

- Developed Human Resource Management System for employee data and performance tracking.
- Created Invoice Tracking System for automated invoicing and reconciliation.
- Gained hands-on full-stack development and relational database design experience.
- Developed SSRS reports for financial data analysis.

EDUCATION

Bachelor of Technology – Computer Technology

Graduated: 2017

Technical University of Kenya/Nairobi, Kenya

KEY ACHIEVEMENTS

- Reduced software deployment cycle by 50% through end-to-end CI/CD automation in Azure DevOps.
- Served as sole Source Control Owner at Tovuti Group - defined Git strategy, enforced branch policies, and maintained release integrity for 10+ engineers.
- Owned CI/CD pipeline design and implementation at both Tovuti Group and Uttamb Solutions, enabling automated, error-free deployments.
- Led a development team for 2 years at Tovuti Group - drove sprint planning, backlog grooming, and Agile ceremonies improving sprint velocity by 35%.
- Architected Microservices decomposition and Docker container orchestration, enabling scalable, high-availability deployments.
- Managed 5+ enterprise-level projects simultaneously with 100% on-time delivery and client satisfaction.
- Boosted system performance by up to 40% through cloud migration, query optimisation, and architecture redesign.
