Professional Summary

A highly motivated and results-driven Software Engineer with a Bachelor of Science in Computer Science and a Second Class Upper Division. Proven expertise in developing and maintaining applications across multiple platforms, including React Native, Flutter, and FastAPI for backend services. Experienced in re-architecting systems to enhance business interactivity and improve productivity, with a strong background in Odoo Development.

Adept at modern software development practices, including CI/CD, Kubernetes, and Docker, with a solid foundation in Next.js, SQL, and noSQL databases. Possesses a creative and innovative aptitude with a keen interest in AI research. A dedicated professional with a track record of tackling software challenges, coding updates, and contributing to both corporate and public sector environments.
