Profile

Certified Data Scientist with a strong foundation in Business and IT, specializing in data analysis, financial reporting, and systems management. Adept at transforming complex datasets into actionable insights that enhance decision-making and operational efficiency. Brings additional expertise in digital marketing analytics, enabling a deeper understanding of customer behavior and campaign performance. Recognized for a collaborative mindset, continuous learning, and the ability to align analytical solutions with business strategy to drive organizational growth.

Professional Experience

IT Officer, Acorn Community Hospital	03/2025 – 03/2026 Mombasa, Kenya
• Recommended, procured, and successfully deployed a Hospital Management System (HMS), eliminating paperwork and streamlining hospital operations. • Spearhead the setup and maintenance of internet infrastructure, ensuring stable connectivity across all departments. • Train hospital staff on the use of the Hospital Management System (HMS) for efficient service delivery. • Act as liaison with HMS developers, reporting any issues or concerns and recommending improvements. • Provide day-to-day IT support across all departments, resolving hardware, software, and connectivity issues. • Ensure optimal performance and security of hospital computers and IT equipment. • Served as Acting Administrator in the absence of the Administrator, overseeing and coordinating all administrative operations, staff supervision, and department workflows to ensure seamless hospital functioning. • Assist with any other allocated tasks in line with IT and administrative needs of the hospital.	
Finance and Data Analyst-Assistant to the Finance Manager(Consultant), Saferworld Global	02/2025 – 03/2025 Nairobi, Kenya
• Conducted financial analysis, including budget vs. actual expenditure and burn rate reviews for key projects. • Reconciled financial reports and transaction listings, identifying and correcting discrepancies. • Entered and updated payment vouchers, petty cash, and transaction records. • Verified receipts, corrected Payment voucher numbers, and supported document scanning. • Prepared financial reports and summaries for internal presentation.	
Volunteer Mentor, Everything Data Community	01/2025 – 03/2025 Nairobi, Kenya
As a Volunteer Mentor, I guided and supported a group of mentees in their journey toward mastering data analytics. My key responsibilities included: • Providing one on one support to help mentees overcome challenges and strengthen their data analytics skills. • Leading group discussions and workshops on key topics to enhance learning. • Sharing industry insights to broaden mentees' understanding of current practices.	

- Offering constructive feedback to foster continuous learning in a collaborative environment.

Data Analyst, Unibrain industries Porridge4Life Foundation

02/2024 – 11/2024

Nairobi, Kenya

- Cleaned, analyzed, and visualized field data to extract data-driven insights, helping stakeholders quickly understand trends and make informed decisions.
- Developed impact assessment reports, presentations and dashboards to communicate data insights to stakeholders.
- Conducted market research and prepared reports on competitor products to ensure continued competitiveness of our offerings.
- Managed the company's websites and performed any additional tasks allocated.

Internship, Webmasters

10/2023 – 01/2024

Nairobi, Kenya

- I effectively handled various data entry tasks in the system.
- I conducted quality assurance of software products, ensuring they meet specified requirements and standards.
- I actively participated in digital marketing initiatives.

Attachment, Nouveta Limited

01/2023 – 04/2023
