Professional Summary

Motivated Software Developer with a Bachelor's in Business Computing and hands-on experience in configuring, developing, and testing software solutions using Python, JavaScript, and SQL. Passionate about e-government solutions and COTS software configuration for land management, business licensing, professional licensing, and code enforcement. Skilled in Agile and Waterfall methodologies, report development, data migration, and delivering user-focused documentation. Eager to contribute to BQI Tech's innovative technology services for state and local governments, ensuring customer satisfaction through detailed requirements review and efficient solution deployment.

Work Experience

Software Developer, Namu Cars Ltd, Nairobi, Kenya

January 2024 – Present

- Configured and developed web applications using Flask (Python), Node.js, React.js, and JavaScript, customizing solutions to meet user requirements and improving system usability for 10,000+ users.
- Reviewed business requirements and optimized RESTful APIs, reducing data retrieval time by 15% through scripting and testing, while documenting technical and end-user guides.
- Participated in data migration and preprocessing using Pandas and MySQL, ensuring seamless integration and performing feature engineering for scalable solutions.
- Collaborated in Agile teams, conducting code reviews, presenting updates to stakeholders, and supporting cross-functional development with a focus on customer needs.

Marketing Researcher, KOKO Networks, Nairobi, Kenya

January 2023 – December 2023

- Analyzed market data using Python (Pandas) and SQL to identify trends, configuring dashboards for 20+ stakeholders and optimizing campaign success by 10%.
- Developed and documented data-driven reports, translating complex findings into actionable insights with strong presentation skills.
- Supported customer onboarding processes, reviewing requirements and ensuring compliance with operational guidelines in a fast-paced environment.
- Contributed to data conversion and migration tasks, streamlining workflows for efficient service delivery.

Education

Bachelor of Science in Business Computing

September 2019 – June 2024

Jomo Kenyatta University, Nairobi, Kenya

Specialized in software development, database systems, cloud computing, and information technology.

Kenya Certificate of Secondary Education (KCSE)

2015 – 2018

Lenana School, Nairobi, Kenya

Grade: B-

Project Experience

Fintech Data Analysis Project

2024

- Designed and implemented an ETL pipeline using Python and MySQL to process transaction data, configuring solutions for scalable data migration and integration.
- Developed visualizations and reports using Matplotlib, Excel, and PowerPoint, documenting findings for stakeholders and demonstrating interest in report development tools like SSRS or Crystal Reports.
- Tested and optimized workflows, improving processing efficiency by 10%, with a focus on configurable systems applicable to licensing and asset management.

Certifications

- Certificate in Data Engineering, WorldQuant University (January 2024)
- Certificate in Data Fundamentals, IBM (January 2024)
- Enterprise Design Thinking Practitioner, IBM (August 2023)
- Cloud Computing, CloudSec (January 2021)

Skills

- **Programming & Scripting:** Python (Pandas, Matplotlib, Flask), JavaScript (Node.js, React.js), SQL (MySQL, Oracle/SQL Server familiarity)
- **Methodologies:** Agile, Waterfall
- **Tools & Technologies:** JIRA, Microsoft Word, ETL processes, Data Migration/Conversion, Report Development (Matplotlib, Excel; interest in SSRS/Crystal Reports)
- **Soft Skills:** Strong written and verbal communication, presentation experience, attention to detail, customer-focused problem-solving
- **Interests:** COTS software configuration, e-government solutions, land management, business licensing, professional licensing, code enforcement
