EDUCATION

2021-2025

MULTIMEDIA UNIVERSITY OF KENYA

- Bsc, Software Engineering

2016-2019

PANGANI GIRLS SCHOOL

- KCSE mean grade A-

TECHNICAL SKILLS

- SQL (Oracle, SQL Server) – queries, scripts, data migration
- Basic JavaScript (form validations, business logic)
- Requirements gathering and documentation
- COTS software configuration (academic exposure/interest)
- System testing and troubleshooting
- Agile & Waterfall methodologies

SOFT SKILLS

- Strong written and verbal communication
- Analytical and problem-solving mindset
- Detail-oriented and organized
- Team collaboration and adaptability
- Customer-focused approach
- Willingness and eagerness to learn new technologies

LANGUAGES

- English
- Swahili

PROFILE

A motivated and adaptable software engineering graduate with a strong foundation in software development, databases, and problem-solving. Skilled in translating requirements into practical solutions, writing SQL scripts, and applying basic JavaScript for configuration and logic. Familiar with both Agile and Waterfall methodologies, with experience working on academic and team projects involving system design, data migration, and end-user documentation. Passionate about learning new technologies and applying them to deliver solutions that improve efficiency, accuracy, and customer satisfaction.

PRROJECTS & EXPERIENCE

Student Information Management System

FEB 2025 - MAY 2025

Multimedia University of Kenya Capstone Project

- Designed and developed a system to manage student records and course registrations.
- Wrote SQL scripts to handle data storage, retrieval, and validation.
- Used JavaScript for input validation and dynamic interactions on the front end.
- Documented requirements and prepared a user guide to support system adoption.

Inventory Management System

SEP 2024 - DEC 2024

Multimedia University of Kenya Course Project

- Designed and developed a system to track inventory levels, suppliers, and customer orders for a small retail setting.
- Wrote SQL scripts to manage stock data, generate summaries, and ensure data accuracy.
- Used JavaScript for input validation and to add interactive features on the user interface.
- Prepared technical documentation and a user manual to support end-user adoption.
