Professional Summary

Eric Musembi is a Full-stack Web Developer with hands-on experience in building and deploying scalable web applications using React.js, Next.js, Flask, and relational databases (MySQL, PostgreSQL, SQLite). Skilled in both **frontend and backend development**, database design, RESTful API integration, and modern frameworks. Adept at collaborating with cross-functional teams, optimizing UI/UX, and setting up CI/CD pipelines for efficient deployment. Successfully built and deployed ERP and eCommerce platforms, integrating authentication, payment systems, and scalable databases. Certified Software Engineer (Moringa School) with growing expertise in testing and system design. Strong leadership background as an Operations Manager leading teams of 20. Passionate about leveraging technology to create secure, user-friendly, and impactful solutions in critical sectors such as healthcare and business.

Technical Skills

- **Languages:** Python, JavaScript, TypeScript, SQL, GO
 - **Backend:** Go-Gin, Python-Flask, REST APIs, CRUD operations, Authentication & Authorization
 - **Frontend:** React.js, Material-UI, Bootstrap, Typescript
 - **Databases:** SQLite, MySQL, PostgreSQL, MongoDB
 - **Testing:** Jest, Pytest, Cypress (unit, integration, E2E)
 - **DevOps:** Git, GitHub Actions (CI/CD), Docker (basics).
 - **Tools & Platforms:** GitHub, Postman, VS Code, Agile Development
 - **Other:** M-Pesa Integration, Generative AI integration, System Architecture, Security Best Practices
-

Projects

E-commerce Platform (Cakeland Delicacies)

Tech: Flask, MySQL, React.js, REST APIs, M-Pesa

- Built **backend APIs** for products, orders, and payments.
- Designed and implemented a **responsive admin dashboard** for inventory and order tracking, boosting online sales by **25%**.
- Developed **frontend features** for product browsing and checkout.
- Implemented **authentication & role-based access** to secure operations.

ERP System (Ongoing)

Tech: Flask, MySQL, React.js, TypeScript

- Designed relational schema for **users, products, and customers**.
- Implemented **CRUD APIs** for operations management.
- Built **admin-only dashboard** with authentication and access control.
- Integrated **frontend components** for managing workflows and visualizing data.

Event Planner Management App

Tech: Flask, SQLite, React.js

- Developed **REST APIs** to handle large datasets.
- Built **interactive dashboards** for planning, scheduling, and task allocation.
- Implemented **frontend visualizations** for real-time event data.

Travel Booking Website

Tech: Flask, SQLite, React.js

- Built **booking APIs** and integrated a **payment system**.
- Designed the **frontend booking flow** (search, reserve, pay).
- Developed **backend for customer and booking data** with secure storage.

Work Experience

Software Developer – GoHiTech Global Technologies *(Jan 2024 – Present)*

- Developed and deployed solutions using Flask, React.js, and REST APIs.
- Built SQL database integrations for robust data management.
- Designed scalable architectures, optimized version control with Git/GitHub.

Operations Manager – Cakeland Delicacies *(Feb 2021 – Present)*

- Introduced data-driven inventory & sales systems.
- Streamlined workflows, improving efficiency and customer service.
- Led a team of 20 to execute production and order fulfillment.

Stock Controller & Stores Officer – New Muthokinju Hardware Ltd *(Oct 2018 – Jan 2021)*

- Implemented inventory management systems and automated reporting.
- Improved accuracy in stock and supply chain tracking.

Leadership Development Associate – FOCUS Kenya *(Aug 2017 – Jul 2018)*

- Designed leadership reporting tools and policy manuals.
- Mentored students in leadership and organizational growth.

Education

- Certified Software Engineer, Moringa School *(2023 – 2024)*
- Bachelor of Science in Geology, University of Nairobi *(2013 – 2016)*
- Kenya Certificate of Secondary Education (KCSE), Kinyui Boys High School *(2008 – 2011)*
