---

## PROFESSIONAL SUMMARY

Results-driven Backend Developer and DevOps Engineer with experience building platforms from scratch to production, including a full-scale **EdTech platform at StudybuddyAfrica**. Skilled at supporting developers and technical partners through **SDKs, sample code, how-to guides, and documentation**. Strong background in **Python, APIs, DevOps automation, and cloud infrastructure**. Adept at managing GitHub repositories, triaging technical issues, and delivering developer tutorials and webinars. Passionate about **education, narrowing the digital divide, and open digital infrastructure for public good**.

---

## CORE COMPETENCIES

- **Developer Support & Documentation:** SDKs, API docs, FAQs, how-to guides, GitHub repositories
  - **EdTech Platform Development:** Designed and launched platforms for online learning and collaboration
  - **Programming & APIs:** Python, JavaScript, RESTful APIs, GraphQL, OAuth 2.0, SDKs
  - **Version Control & Release Management:** Git, GitHub, Bitbucket, CI/CD pipelines
  - **Cloud & Infrastructure:** AWS, Azure, Docker, Kubernetes, Terraform, Ansible
  - **Technical Communication:** Webinars, tutorials, Q&A sessions, developer onboarding
  - **Collaboration:** Agile, cross-functional teamwork, support issue triaging
- 

## PROFESSIONAL EXPERIENCE

**AI Engineer & Senior Backend Developer – Alluvium**

*01/2025 – Present | Nairobi, Kenya*

- Designed scalable backend applications integrating Atlassian tools (Jira, Confluence) with third-party platforms.
  - Developed microservices and APIs serving 10K+ users with 99.9% uptime.
  - Built and deployed AI/ML models for automation using TensorFlow and PyTorch.
  - Created **Atlassian Forge applications** to enhance developer workflows.
  - Collaborated with support teams to improve **developer onboarding and documentation**.
- 

## DevOps Engineer – Alluvium

*06/2024 – Present | Nairobi, Kenya*

- Built automated CI/CD pipelines with Jenkins and Azure DevOps, reducing deployment time by 60%.
  - Managed GitHub/Bitbucket repositories, version control, and release notes.
  - Implemented infrastructure as code (Terraform, Ansible) for AWS and Azure.
  - Established developer monitoring and support systems using Prometheus and ELK Stack.
- 

## Senior Backend Developer – StudybuddyAfrica (EdTech Platform)

*06/2021 – Present | Nairobi, Kenya*

### Project: EdTech Platform – StudybuddyAfrica

- **Built an EdTech platform from scratch to production**, enabling students and educators to collaborate online.
- Designed backend architecture using Python (Flask/Django) and PostgreSQL for scalability.
- Developed and documented **RESTful APIs and SDKs** for integration with external systems.
- Authored **technical documentation, FAQs, and onboarding guides** to support developers and educators.
- Managed GitHub repositories, version control, and coordinated release processes.
- Conducted **webinars, tutorials, and live demos** to train users and technical partners.

- Triageed technical support issues, maintained issue tracking logs, and collaborated with engineering teams to resolve challenges.
  - Integrated third-party APIs (payments, learning tools) and implemented caching/queuing systems for performance optimization.
- 

## TECHNICAL SKILLS

- **Languages:** Python (Django, Flask, FastAPI), JavaScript, Java
  - **Databases:** PostgreSQL, MySQL, MSSQL, MongoDB, Redis
  - **DevOps Tools:** Jenkins, GitHub Actions, GitLab CI/CD, Docker, Kubernetes
  - **Infrastructure:** AWS (EC2, RDS, S3, Lambda), Azure, Terraform, Ansible
  - **Documentation & Support:** GitHub, Markdown, FAQs, SDK writing, webinars
- 

## EDUCATION & CERTIFICATIONS

**University of Nairobi** – B.Sc. Physics | *2016 – 2021*

**Jomo Kenyatta University of Agriculture & Technology** – Advanced Certificate in Data Science & AI | *2025*

### Professional Certifications

- AWS Cloud and DevOps Engineer
  - Backend Software Engineering Specialist
  - Agile Development Practitioner
- 

## KEY ACHIEVEMENTS

- Successfully built and launched a **full EdTech platform** from scratch to production, serving learners and educators across Africa.
- Authored developer guides, SDKs, and API documentation that improved onboarding efficiency for technical partners.
- Improved database query performance by 40% through PostgreSQL optimization.
- Reduced deployment time by 60% with CI/CD automation.
- Achieved 99.9% system uptime for production platforms.
