Hiring Manager

AZA Finance

Nairobi, Kenya

Dear Hiring Manager,

I am writing to express my interest in the Data & Accounts Analyst position at AZA Finance. With a strong foundation in data analytics, financial data handling, and a passion for driving efficiency through data-driven decisions, I am excited about the opportunity to contribute to a fast-paced, high-impact fintech environment.

Through my recent role as a freelance Data Analyst on platforms like Fiverr, I gained hands-on experience analyzing financial and operational data, reconciling transaction records, and building interactive dashboards using Power BI, Excel, and Tableau. I routinely worked with Python and SQL for ETL processes, data cleaning, and automation, skills that align closely with the technical expectations of this role.

During my Data Science certification course with ALX Africa, I completed real-world projects involving financial forecasting, customer insights, and customer sentiment analysis. I have also supported data accuracy and reporting efforts while working with remote teams, demonstrating my ability to collaborate effectively and manage deadlines independently.

I am particularly drawn to AZA Finance's mission of advancing global access to frontier markets through innovation. I am confident that my technical acumen, analytical mindset, and enthusiasm for continuous improvement will make me a valuable addition to your finance team.

Thank you for considering my application. I look forward to the opportunity to contribute to AZA Finance's vision and to grow within your dynamic team.

Sincerely,

Nancy Wanjohi
