+254724570680

SOFTWARE ENGINEER

 <https://github.com/techbeatproductions>

SUMMARY

Technically driven software engineer with a strong foundation in Java, Android development, UI/UX design, and full-stack web technologies. Skilled in building scalable systems using RESTful APIs, relational databases, and client-server architectures. Experienced in backend development with a focus on clean, maintainable code and system efficiency. Eager to pursue further studies to deepen expertise in advanced computing and emerging technologies. Motivated by continuous learning and a passion for solving complex, real-world problems.

EXPERIENCE

08/2025-07/2026

ISUZU EAST AFRICA

GRADUATE IN TRAINING

- IT Support & End-User Assistance:

Delivered daily technical support to 50+ users, resolving hardware, software, and network issues, reducing downtime and improving user productivity.

- Enterprise Application Support:

Provided support for SAP, Zoho Expense, and AutoMaster, troubleshooting access, transaction, and system issues to maintain uninterrupted business operations.

- Microsoft 365 Administration & Support:

Resolved issues across Microsoft Teams, Outlook, and OneDrive, including authentication failures, sync errors, and access permissions.

- Active Directory & Identity Management:

Administered user accounts in Active Directory, handling password resets, account provisioning, and access control, while ensuring compliance with security policies.

-
- **Group Policy & System Configuration:**
Supported implementation of Group Policies to standardize configurations, enforce security controls, and improve endpoint management.
 - **Device Deployment & Lifecycle Management:**
Configured and deployed corporate laptops during refresh cycles (OS imaging, domain joining, software setup), ensuring seamless onboarding for end users.
 - **Systems Training & Adoption:**
Conducted user training sessions for newly deployed systems, improving adoption rates and reducing support requests.
 - **Power Platform Solutions Development:**
Developed internal applications using Power Apps and automated workflows with Power Automate, eliminating manual processes and improving operational efficiency.
 - **Mentorship & Knowledge Transfer:**
Trained and supported IT attachees, improving team efficiency and onboarding speed.
-

07/2025-08/2025

**KENYA POST OFFICE SAVINGS BANK (POSTBANK) PENSIONS DEPARTMENT
INTERN**

- **Pension Data Management:** Assisting in maintaining and updating pension account records, ensuring accuracy and consistency across core banking and pension systems.
- **Financial Systems Support:** Providing technical support for internal applications used to manage pension contributions, disbursements, and beneficiary records.
- **User Access Control:** Helping configure and manage secure access for staff handling sensitive pension data, in compliance with data protection and audit policies.
- **Data Integrity Checks:** Supporting reconciliation processes by extracting pension-related transaction logs and verifying data accuracy between systems.
- **Client Support & Documentation:** Assisting in resolving technical queries related to pension account access and contributing to documentation of IT support procedures in pension operations.

06/2024 – 05/2025

TECH BEAT PRODUCTIONS

Software Engineer

- ERP System Development: Spearheaded the full-stack development of a custom ERP system using Vue.js and Laravel, tailored for business operations across finance, sales, procurement, and inventory management.
- Payment Gateway Integration: Integrated M-Pesa and KCB payment APIs into the system, enabling secure mobile and bank transactions directly from the ERP interface.
- Finance Module Implementation: Built and deployed the finance module to manage transactions, generate real-time financial reports, and maintain accurate account balances.
- Inventory Management Automation: Developed logic for real-time stock tracking, reorder alerts, and inventory adjustments, improving operational efficiency and reducing stock-outs.
- Dynamic PDF Receipt Generation: Automated the generation and downloading of PDF receipts for transactions, ensuring professional documentation and user transparency.
- Procurement Workflow Design: Implemented procurement pipelines including supplier management, purchase orders, and approval flows to streamline sourcing processes.
- REST API Development: Created clean, versioned RESTful APIs for frontend-backend communication, external integrations, and mobile access.
- Frontend UI/UX Engineering: Designed responsive and intuitive interfaces using Vue.js, ensuring smooth user experiences across modules and screen sizes.
- Security and Error Handling: Embedded robust error handling, validation, and user access control to maintain data integrity and application stability.
- ERP System Development: Spearheaded the full-stack development of a custom ERP system using Vue.js and Laravel, tailored for business operations across finance, sales, procurement, and inventory management.
- Payment Gateway Integration: Integrated M-Pesa and KCB payment APIs into the system, enabling secure mobile and bank transactions directly from the ERP interface.
- Finance Module Implementation: Built and deployed the finance module to manage transactions, generate real-time financial reports, and maintain accurate account balances.
- Inventory Management Automation: Developed logic for real-time stock tracking, reorder alerts, and inventory adjustments, improving operational efficiency and reducing stock-outs.
- Dynamic PDF Receipt Generation: Automated the generation and downloading of PDF receipts for transactions, ensuring professional documentation and user transparency sizes.

06/2021 – 11/2024

TECH BEAT PRODUCTIONS

PART TIME (While Studying)

SOCIAL MEDIA MANAGER & VIDEOGRAPHER

- **Media Ministry Service (2016–Present):** Actively served in the media ministry at Deliverance Church Kayole, contributing to all aspects of media production including live streaming, photography, and technical setup.
- **Social Media Manager (2021–2024):** Managed social media presence for Tech Beat Productions, planning and publishing content that improved audience engagement and visibility across platforms.
- **Event Photographer (2021–2024):** Provided professional photography services for events such as weddings, graduations, funerals, and baby showers, capturing high-quality images for both personal and commercial use.
- **Event Videographer (2021–2024):** Recorded and edited video content for diverse events, delivering polished productions tailored to each client's requirements and event tone.
- **Live Streaming Operator:** Spearheaded live streaming services at Deliverance Church Kayole, enabling real-time broadcast of church services to online audiences using professional-grade equipment and software.
- **Post-Production Editing:** Handled editing and post-processing of video and photo content using tools such as Adobe Premiere Pro and Lightroom, ensuring professional output and timely delivery.
- **Technical Setup & AV Management:** Set up and maintained audiovisual systems for both church services and client events, including camera rigs, lighting, audio mixers, and streaming software.
- **Creative Direction & Storytelling:** Led the creative direction of shoots and storytelling for both personal and commercial projects, ensuring content captured emotional and narrative value.
- **Client Engagement & Delivery:** Coordinated with clients to plan shoot logistics, understand deliverable expectations, and ensure high satisfaction with final media assets.
- **Team Collaboration:** Worked closely with media teams in both church and production contexts, mentoring junior team members and ensuring smooth execution of all production workflows.

EXPERIENCE

08/2023 – 11/2023

KOCELA LIMITED

Software Engineer

- **Perfected UI/UX Designs:** Worked on refining UI/UX designs for the Lens Craft app and successfully presented the finalized designs to the team, ensuring a user-friendly and aesthetically pleasing interface.
- **Architected Scalable Solutions:** Designed the architecture for the Lens Craft app with a strong emphasis on scalability and maintainability, ensuring the app can grow and adapt over time.
- **Detailed Service Mapping:** Created comprehensive flowcharts for core services within the app, including booking, authentication, and user management, ensuring smooth and efficient user experiences on the Android platform.
- **Error Handling & Stability:** Implemented robust error handling and security measures to protect user data and maintain application stability across Android and iOS platforms.
- **Code Quality Enhancement:** Actively participated in code reviews and design discussions, providing valuable insights that enhanced the overall quality of the codebase.
- **API Development:** Developed and tested APIs and endpoints for an iOS activation tool and a System Monitoring tool, ensuring reliable and secure communication between the front-end and back-end systems.
- **UI/UX Design for Mobile Banking:** Contributed to the creation of UI/UX designs for a mobile banking application, focusing on intuitive design and user-centered functionality.
- **Back-End and Web Development:** Contributed to back-end development using Java, focusing on database integration and REST API development to support both Android and web portal clients. Utilized the Java Play Framework to manage models and databases effectively, ensuring robust and efficient data handling.
- **Cross-Platform Integration:** Collaborated closely with front-end developers to ensure seamless integration of UI/UX elements with back-end logic, optimizing performance across Android and iOS devices.
- **Security Implementation:** Secured data across all APIs using RSA encryption, ensuring that user information was protected and that the application maintained high security standards.
- **Structured Data Interactions:** Developed sequence diagrams and Entity-Relationship Diagrams (ERDs) to illustrate the app's data structure and interactions between components, providing a clear blueprint for development.

08/2016 – Ongoing

DELIVERANCE CHURCH KAYOLE

Church Service & Technical Volunteer

- Youth Ministry Leadership: Organize and lead youth events, Talent showcases; mentor teens and young adults on personal growth and faith.
- Event Coordination: Support planning and logistics for church-wide events, youth conferences, and holiday services.
- Sound System Management: Operate and maintain church PA systems, mixers, microphones, and speakers during weekly services and special events.
- Audio Troubleshooting: Resolve signal path issues, feedback loops, and hardware malfunctions under time-sensitive conditions.
- Live Streaming Lead: Designed and implemented church's live stream workflow using OBS and digital AV hardware; ensure high-quality weekly broadcast across platforms.
- Technical Training: Train junior volunteers and rotating teams on soundboard use, camera operations, and live streaming protocols.
- Screen Installation & Servicing: Set up large format displays and digital signage; perform wiring, mounting, calibration, and routine servicing.
- Network Infrastructure Setup: Installed structured cabling and network hardware (routers/switches) to support AV systems and staff IT needs.
- Maintenance & Upgrades: Assist with maintenance and upgrades of multimedia, IT, and electrical systems in the sanctuary and admin offices.
- Documentation & Inventory: Maintain logs of equipment usage, maintenance schedules, and inventory of AV hardware and accessories.
- Recognition & Awards: Received the Bishop's Award in recognition of years of faithful service and technical contributions to the ministry.
- Collaborative Ministry Work: Coordinate with worship team, pastoral staff, and other departments to ensure seamless service execution.
- Problem-Solving Under Pressure: Known for resolving technical issues in real time during live services without disruptions.
- Ethical and Faith-Based Leadership: Demonstrate responsibility, humility, and a servant-leader mindset in all roles, inspiring others by example.

EDUCATION

2021 – 2024	JOMO KENYATTA UNIVERSITY OF AGRICULTURE AND TECHNOLOGY (JKUAT) Graduated on 29th November 2024 with a Bachelor of Science in Information Technology (Second Class Upper Division)	
2012 – 2015	MOI HIGH SCHOOL KABARAK Kenya Certificate of Secondary Education	A–
2002 – 2011	NEW LIGHT JUNIOR ACADEMY Kenya Certificate of Primary Education	A–

PROFESSIONAL SKILLS

System Design and Architecture	• Diagrams & Modeling : Proficient in creating detailed system architecture diagrams, ERDs, Sequence Diagrams, Flowchart and Data Flow Diagrams to map out complex systems. • Project Management: Capable of managing end-to-end mobile application development projects, ensuring timely delivery and quality control.
Mobile Application Development	• Android Development: Extensive experience in building robust and user-friendly Android applications with seamless backend integration. • Machine Learning Integration: Expertise in integrating machine learning models, such as SVDD, OCKNN and Isolation Forest, into mobile applications for advanced authentication models
Backend Development	• API Development & Integration: Proficient in creating and integrating APIs using PHP and Python including machine learning applications in mobile environments • Database Management: Skilled in designing, creating and maintaining SQL databases to support Android applications, with a focus on optimizing data retrieval and storage • Security Protocols: Experience in implementing RSA encryption to secure data transmitted through mobile applications ensuring compliance with security standards..

Religion	• Christian
Hobbies	• Photography & Videography – Enjoy capturing and editing visual content for events and storytelling, both professionally and as a creative outlet. • Live Streaming & Media Production – Passionate about managing live broadcast setups, particularly for community and church events. • Science Fiction & Reading – Avid reader of science fiction literature, particularly books that explore technology, society, and future scenarios. • Film & Series Enthusiast – Enjoy analyzing and discussing films and series, especially those with strong narratives or technological themes. • Documentary Viewing – Interested in documentaries on technology, history, and innovation to stay informed and inspired.
