PROFESSIONAL EXPERIENCE

Nairobi Securities Exchange

Data Analyst and Operations

2024 – 2025

Nairobi, Kenya

- Successfully building and managing reliable data pipelines by aggregating, cleansing and validating complex market datasets, strengthening the integrity of trading and market intelligence outputs.
- Transforming large-scale trading and pricing data into strategic insights by uncovering trends, anomalies and performance drivers that informed operational and market decisions.
- Developing high-impact dashboards and analytical reports on market performance, trading activity and risk indicators, enabling leadership to make timely, evidence-based decisions.
- Partnering with IT teams to automate recurring operational processes, reducing manual workloads and improving system reliability and efficiency.
- Leading the documentation and refinement of technical workflows and procedures, improving IT service delivery, operational consistency and compliance standards.
- Advancing enterprise-wide automation initiatives aligned with organizational strategy, accelerating process execution and scalability across departments.

- Identifying process inefficiencies and operational gaps through data-led assessments, delivering targeted recommendations that improved productivity and overall performance.
- Providing responsive, solutions-focused support to internal and external stakeholders, maintaining high service standards while resolving data and system-related issues efficiently.

Nairobi Securities Exchange

Information Technology Operations Specialist

2023 – 2024
Nairobi, Kenya

- Supported end-to-end IT service delivery operations, ensuring consistent performance and reliability of technology services across the organization.
- Assisted in IT Service Management (ITSM) processes, including incident management, service request handling, and change management to maintain system stability and minimize operational disruptions.
- Monitored and supported data services and operations within the Data Services Division, helping maintain availability, integrity, and performance of enterprise data systems.
- Contributed to continual service improvement (CSI) initiatives, identifying opportunities to enhance service efficiency, system performance, and operational workflows.
- Assisted in the development and documentation of technical processes, procedures, and operational guidelines to improve IT performance, standardization, and service delivery efficiency.
- Collaborated with cross-functional teams to resolve service incidents, troubleshoot system issues, and support timely restoration of IT services.
- Supported enterprise automation initiatives aligned with the organization's strategic plan, helping streamline repetitive operational tasks and improve service delivery efficiency.
- Contributed to maintaining high levels of customer satisfaction by ensuring responsive support, clear communication, and timely resolution of service-related issues.
- Assisted in monitoring service performance metrics and operational reports, supporting data-driven decision-making for IT service improvements.
- Worked closely with internal stakeholders to ensure adherence to service delivery standards, operational policies, and best practices in IT operations.

Nairobi Securities Exchange

Service Delivery Officer

2022 – 2023
Nairobi, Kenya

- Ensured smooth market operations by conducting pre-market readiness checks and coordinating daily activities that enabled uninterrupted market session openings.
- Delivered accurate end-of-day market reports act securities, derivatives and bonds, including index preparation and maintenance to support market transparency and decision making.
- Safeguarded data integrity by verifying daily trading data published on the NSE website and supporting management and market-wide performance reporting.
- Managed and optimized the department e-filing system, improving document control, accessibility and compliance readiness.
- Provided first and second line ICT support across applications, software and hardware, resolving incidents efficiently and minimizing operational downtime.
- Led day-to-day operations of the ICT service desk, delivering reliable application and desktop support while maintaining service management standards.
- Contributed to the design and documentation of technical processes and procedures, strengthening IT efficiency, consistency and service delivery.
- Supported enterprise automation initiatives aligned with organizational strategy, enabling streamlined workflows and improved operational performance.

- Delivered responsive, customer-focused support to internal users, maintaining high service levels and strong stakeholder satisfaction.
- Conducted in-house training on office productivity tools and business software, improving staff capability, system adoption and overall productivity.

National Council for Population and Development

IT Associate

2021 – 09/2022

Nairobi, Kenya

- Provided technical support for internal systems and end-user devices, troubleshooting hardware, software, and connectivity issues to ensure smooth day-to-day operations across departments.
- Assisted in the installation, configuration, and maintenance of government IT systems, ensuring reliable access to internal applications, databases, and digital services.
- Supported data collection and management initiatives, helping organize, validate, and digitize datasets used for policy planning, reporting, and public service delivery.
- Collaborated with technical and administrative teams to maintain IT infrastructure, including network connectivity, printers, and shared office systems.
- Assisted in IT asset tracking and documentation, maintaining updated records of institutional hardware, software licenses, and system configurations.
- Participated in system updates, troubleshooting sessions, and basic network monitoring, helping maintain operational continuity for staff and public service platforms.
- Participated in a field survey mission to Wajir County, supporting the collection and validation of field data, assisting with digital data capture tools, and ensuring proper documentation of survey responses.
- Worked alongside field teams to organize survey logistics, manage digital records, and maintain data accuracy for use in government reporting and planning.
- Maintained technical documentation and user support materials, improving knowledge sharing and helping staff resolve basic system issues more efficiently.
- Maintained organization's website ensuring 99% up and runtime together with updating the website with institutional content.
