: SEO Optimization, Page Speed Improvement, Caching Techniques

WORK EXPERIENCE

WordPress Web Developer

PUEA-TveT (Presbyterian University of East Africa)

| **Kiambu, Kenya July 2025-Present**

- Currently Developing and maintaining a comprehensive WordPress website for PUEA Technical and Vocational Education and Training Institute
- Implementing search engine optimization (SEO) strategies to improve online visibility and organic traffic
- Customizing WordPress themes and plugins to meet institutional requirements and enhance user experience
- Optimizing website performance, loading speeds, and mobile responsiveness across all devices
- Managing content management system (CMS) administration and regular website updates
- Conducting technical maintenance, security updates, and backup management
- Integrating social media platforms and third-party tools to enhance institutional

SOFT SKILLS

- Problem-Solving
- Time Management
- Communication
- Adaptability
- Team Collaboration
- Creativity
- Attention to detail

communication

- Collaborating with stakeholders to gather requirements and implement feature enhancements

Full stack Developer

Dune Leave management system -School Project |

January 2025 – March 2025

- Developed a comprehensive Leave Management System using PHP and MySQL for backend operations and HTML, CSS, and JavaScript for the frontend.
- Designed an intuitive user interface to manage employee leave requests, approvals, and tracking.
- Implemented secure authentication and authorization mechanisms to ensure data security.
- Conducted performance optimizations to enhance system efficiency and user experience.

AI Study Assistant — Python, FastAPI & Groq LLM Aug 2024 – Present

Personal Project, GitHub- June 2025 – July 2025

<https://github.com/ANDERSON254KE/interactive-school-tutor>

- Developed a 450-line FastAPI service that ingests mixed-format course materials (PDF, DOCX, PPTX, XLSX), extracts text and tables with python-docx / PyPDF2 / openpyxl, and stores vector embeddings in FAISS for semantic search.
- Integrated the Groq Cloud Llama-3-70B model via streaming REST calls, returning concise answers
- Good prompting skills: the ability to craft clear, context-rich prompts that guide LLMs to accurate, concise, and role-appropriate outputs; includes iterative refinement, few-shot examples, and dynamic prompt templates.

Project: CV Parser and Management System

Personal Project / Open Source – 2025

<https://github.com/ANDERSON254KE>

- Designed and implemented a web application for parsing and managing CVs with a user-friendly interface.
- Built a **CV upload feature** that extracts data such as personal information, work experience, education, skills, and referees.
- Developed **automated form population** using extracted CV data to reduce manual entry and improve accuracy.
- Integrated **database storage** for structured candidate information, enabling future reference and management.
- Implemented feedback and error-handling mechanisms to guide users during CV uploads.
- Used **Python (Flask/Django)** and libraries for text extraction (e.g., PyPDF2, python-docx) to process and parse CVs.

WordPress Web Developer

mialesavanna ,Nairobi ,Kenya - October 2024 – February 2025

mialesavanna.co.ke

- Designed and developed an engaging travel platform, showcasing Kenya's top destinations with a visually immersive and user-friendly experience.
- Enhanced site performance, reducing page load time from 8 seconds to under 3 seconds by implementing caching, image compression, and speed optimization techniques
- Integrated a seamless booking system, allowing travelers to book hotels and travel packages directly—leading to a 50% increase in completed bookings within the first three months.
- Boosted SEO rankings, achieving first-page Google visibility for 10+ travel-related keywords through structured

metadata, schema markup, and optimized content.

- Crafted a fully responsive, mobile-first design, ensuring flawless browsing across all devices, from smartphones to desktops.
- Implemented animations and interactive elements, making the user journey more engaging and increasing time spent on the site by 40%.
- Delivered the project ahead of schedule, allowing the client to launch marketing campaigns earlier and attract early bookings.

WordPress Web Developer

MitlaPhase Construction, Nairobi -July 2024 –
September 2024

Mitlaphase.co.ke

- Successfully developed and launched fully responsive, user-friendly websites using WordPress, Elementor customized to meet client branding and functionality requirements.
- Conducted in-depth SEO audits to identify and resolve technical and content-related issues, optimizing websites for better search engine rankings.
- Researched and implemented high-performing keywords, meta tags, and on-page SEO strategies, leading to increased organic traffic and improved visibility.
- Leveraged analytics tools (e.g., Google Analytics, Search Console) to monitor website performance, identify trends, and refine strategies for higher conversions.
- Collaborated with marketing teams to integrate SEO efforts into broader digital campaigns, resulting in a measurable increase in sales and client revenue.

WordPress Web Developer

Bacio Builders ,Nairobi - December 2023 – April 2024

baciobuilders.co.ke

- Designed and developed a modern, responsive website for Bacio Builders using WordPress and Elementor, creating an engaging and user-friendly experience to highlight the company's construction expertise.
- Utilized Elementor to customize layouts, optimize site navigation, and create visually appealing designs tailored to client needs and branding.
- Focused on mobile responsiveness to ensure seamless functionality across all devices, enhancing user engagement and accessibility.
- Conducted on-page and technical SEO optimizations, including keyword research, meta tags, and structured data implementation, to improve
