SUMMARY

Results-driven Principal Software Engineer with over 5 years of experience architecting and delivering scalable, cloud-native solutions using Java, Spring Boot, and AWS. Proven expertise in microservices architecture, event-driven systems, and real-time data streaming using Apache Kafka. Demonstrated leadership in driving end-to-end system design, cloud infrastructure automation, and API development across diverse sectors including fintech, agri-tech, and public sector systems. Adept at leading agile teams, mentoring developers, and collaborating across cross-functional units to deliver high-impact products. Strong background in DevOps practices, CI/CD pipelines, and secure authentication with Keycloak and OAuth. Passionate about building performant, maintainable systems and enabling seamless user experiences through cloud innovation and engineering excellence.

SKILLS

Programming & Frameworks

Java (Core, 17, 21), Spring Boot, Spring MVC, Spring Security, Hibernate, RESTful APIs, JSON, Maven

Cloud & DevOps

AWS (EC2, S3, VPC, EBS, Lambda, CloudWatch), Docker, Jenkins, GitHub Actions, GitLab CI/CD, Nginx, Terraform (basic), Kubernetes (intro)

Databases

MySQL, PostgreSQL, MongoDB, DynamoDB, Redis

Messaging & Event Streaming

Apache Kafka (Producer/Consumer, Stream Processing), RabbitMQ

Testing

JUnit, Mockito, Postman

Project & Team Tools

JIRA, Confluence, Bit bucket, Git, IntelliJ IDEA, Visual Studio Code, Slack, Linux (Debian/Ubuntu)

Architecture & Practices

Microservices Architecture, API Gateway, Server-less Architecture, Clean Code, SOLID Principles, CI/CD, Agile & Scrum

Soft Skills

Team Leadership, Technical Mentorship, Agile Collaboration, Problem Solving, Communication, Documentation, Decision Making

PROFESSIONAL EXPERIENCE

Melita LTD | Malta

Java Spring/Spring Boot, Cloud Engineer | Aug 2025 – Present

- Designed and implemented AI-as-a-Service solutions leveraging Spring Boot and cloud-native architectures to deliver scalable, intelligent applications.
- Developed real-time, bidirectional communication systems using Web Sockets to power interactive AI-driven features with high concurrency and low latency.
- Collaborated on end-to-end AI integration projects, from data processing pipelines to RESTful and event-driven APIs, ensuring seamless delivery of AI-enhanced business solutions.

Ebiashara Africa Limited | Nairobi, Kenya

Lead Java Spring/Spring Boot, Cloud Engineer | Jan 2024 – Aug 2025

- Led the design and implementation of the Boresha Pay payment system, incorporating micro-services architecture for scalability and flexibility across payment modules.
- Implemented streaming capabilities using Kafka, enhancing real-time transaction processing and improving the overall speed and efficiency of payment transactions.

- Integrated OAuth with Keycloak for secure and seamless authentication, along with Google and GitHub for single sign-on (SSO), improving user security and simplifying login flows.
- Collaborated with AWS to store media in S3 buckets, leveraging AWS Lambda functions to automate workflows, reduce processing times, and enhance system performance.
- Played a key role in developing the Cocobod fertilizer tracking system for Ghana, focusing on creating a robust, real-time system that tracks the distribution of fertilizers to farmers, improving transparency and reducing theft.
- Contributed to the development of the Ghana Electoral Commission system, implementing streaming for real-time data processing and enhancing the system's responsiveness during elections.
- Directed cloud deployment on AWS, utilizing services such as EC2, S3, and Lambda, ensuring high availability, fault tolerance, and cost-effective scaling of applications.

Java Spring/Spring Boot Developer | Aug 2022 – Dec 2023

- Built and maintained APIs for Arronax video-on-demand system, ensuring seamless video streaming and playback functionalities.
- Developed comprehensive unit and integration tests, ensuring the reliability and quality of backend services.
- Documented system architecture, API endpoints, and workflows to streamline developer onboarding and promote best practices.
- Worked closely with team members to design and implement robust API integrations with external systems.
- Collaborated with cross-functional teams to troubleshoot and resolve complex technical issues, ensuring smooth product deployment.
- Participated in code reviews, providing constructive feedback to maintain high code quality standards.

Joovlin | Nairobi, Kenya

Java Spring/Spring Boot Developer | Feb 2020 – March 2021

- Developed and maintained RESTful APIs, improving system performance and integration with third-party services.
- Implemented backend features to support real-time data processing and user interactions.
- Optimized database queries and managed entity relationships to ensure application scalability.
- Built and maintained Spring Security configurations for user authentication and authorization.
- Collaborated with frontend and QA teams to ensure seamless integration and functionality of application features.
- Refined backend logic and enhanced application performance, handling high traffic loads efficiently.

Kenya Agricultural and Livestock Research Organization | Nairobi, Kenya

Software Engineer Intern | Sept 2018 – Dec 2018

- Digitized and maintained agricultural datasets, improving data accuracy by 30%.
- Automated data validation, reducing entry errors by 25%.
- Collaborated with researchers to streamline database management, improving data retrieval speeds.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- AWS Certified Developer Associate

PROJECTS

Disaster Relief Cash Distribution System

- Built a backend platform to simulate direct cash transfers to thousands of recipients during disaster response scenarios.
- Implemented recipient registration, identity verification, and payment distribution workflows using Spring Boot and PostgreSQL.
- Integrated AWS Lambda and SQS to process bulk payment distribution asynchronously.
- Designed APIs for tracking transfer status, payment reconciliation, and reporting dashboards.
- Implemented audit logging and fraud detection triggers for payment monitoring.

EDUCATION

Kenyatta University, Nairobi, Kenya

- Bachelor's Degree in Mathematics & Computer Science (2016 – 2021)
