PERSONAL STATEMENT

An innovative and enthusiastic Business Software Functionality Consultant and Developer, with excellent problem-solving and analytical skills, combined with a quick to learn mindset. From 5 collective years of experience in ERP Development, I have gained a good understanding of business processes from a technology perspective, and technology from a business perspective. I have a good grasp of business software development procedures and proficiency in design and implementation of specific custom business solutions, especially in **Finance, Purchasing, Sales and Inventory Management**. My other technical competencies range from **SQL Server Management** to Web App development, Data Analysis with **SQL Queries, MS Excel** and **Power BI**. I am team player and exude strengths in people skills.

TECHNICAL SKILLS

- Proficient in Microsoft Dynamics 365 Business Central Implementation
- Experienced in Database Administration with Microsoft SQL Server
- Web App development in Python and Flutter Flow tools.
- Data Analysis with SQL Queries, MS Excel and Power BI
- BPMN 2.0 and ERD modelling
- Hansaworld Standard ERP Development
