Professional Summary

I'm an IT and Training Specialist with 15 years of experience turning complex technology environments into stable, secure, and scalable platforms that support real business outcomes. Over the years, I've learned that my greatest value isn't just keeping systems running but acting as the bridge between executive vision and frontline execution.

I translate high-level goals into clear, actionable technical plans, ensuring that what leadership envisions is exactly what teams deliver. At the same time, I bring frontline insights back to decision-makers highlighting risks, opportunities, and efficiencies that influence smarter strategy.

My work sits at the intersection of business and technology:

- Converting strategy into architecture and implementation
- Aligning people, processes, and platforms across teams
- Championing operational excellence, automation, and continuous improvement
- Communicating clearly with both technical and non-technical stakeholders
- Strengthening security, compliance, and system reliability

Whether it's optimizing infrastructure, modernizing workflows, or enabling new capabilities, I focus on delivering solutions that drive resilience, efficiency, and long-term value.

Technical Skills

- Artificial Intelligence: Generative AI, Large Language Models (LLM), AI Models, AI Agents, Prompt Engineering, Machine Learning,
- System Administration: Linux (Debian, Ubuntu, Red Hat), Microsoft 365, Active Directory, DNS Management, Virtualization, Proxmox, Vmware
- Automation & DevOps: Python, Bash, Docker, Ansible, Terraform, Jenkins, CI/CD
- Cloud Platforms: AWS, Azure, GCP, Akamai, Cloudflare
- Web Hosting: Apache, Nginx, MX and DNS Management, Domain Registration
- Networking: TCP/IP, DNS, MX, VPN, SSH, Firewall, Routers, Switches, Access Points

- Security & Compliance: Security Administration, Vulnerability Assessments, Endpoint Protection, Bitdefender, Encryption, Data Protection and GDPR

Soft Skills

- Professional Competencies: Leadership, Innovation, Communication, Collaboration, Analytical Problem-solving, Project Management, Training and Documentation

Professional Experience

Lead Trainer

GOIP Limited (Go-Experience Cloud) | Dec 2025 – Present

GoIP Limited is a technology company in Kenya with 10 years experience in offering technology solutions to SMEs, Government entities, mid-sized and large enterprises across all sectors.

I'm a Lead Trainer responsible for guiding a team of trainers through a complex and high-level training project covering 13 regions across Kenya.

Key Responsibilities:

- Training Strategy & Leadership – Leading the planning and execution of end-user training.
- Content Customization & Session Design – Customizing training and developing scenario-based manuals.
- Training Delivery – Facilitating high-level and multi session training for large & specialized groups, providing trainer support and handling escalated user questions.
- User Proficiency Assessment – Conducting proficiency checks and recommending optimizations to workflows.
- Reporting & Documentation – Preparing detailed weekly reports and updating the management on training outcomes.
- Post-Training – Preparing executive reports and tracking post-training issues.

Systems Administrator

Kenya Network Information Centre (KeNIC) | May 2024 – Oct 2025

KeNIC is the official registry responsible for administering, managing, and operating the .KE country code top-level domains (ccTLDs) in Kenya.

Key Responsibilities:

- Owned and delivered multiple IT projects, aligning outcomes with organizational strategy.
- Supported IT leadership in developing and implementing growth-driven strategic initiatives.
- Administered KeNIC's critical software, hardware, and networks, ensuring uptime, high availability and security.
- Managed Data Centers, Servers and IT infrastructure schedules maintenance and enforced service quality standards.
- Provided internal and external technical support through ticketing and escalation channels.
- Trained staff on emerging technologies and facilitated adoption across teams.

Key Projects:

- Deployed and maintained Linux Servers and Virtual Machines in multiple Data Centers ensuring reliable, secure and high-availability environments.
- Monitored key systems, managed users, permissions, security policies, processes and backups for disaster recovery.
- Email migration to Microsoft 365, improving collaboration and data security.
- Conducted Data Protection Impact Assessments (DPIA) for privacy and compliance on various projects and applications.
- Implemented a Ticketing Support System with Knowledgebase, reducing support queries.
- Integrated an AI-powered chatbot into the corporate website, enhancing customer service and providing 24/7 support.
- Oversaw VAPT projects (2024–2025) on core infrastructure.
- Led migration from TIMS to eTIMS for automated invoice signing.
- Administered LMS platforms and created courses for staff training.

Accomplishments:

- Chair of Reward and Recognition Committee.
- Awarded Departmental Recognition (Q2 & Q4, 2024).
- Winner of Core Value Awards: Innovation (Q3 2024) & Integrity (Q4 2024).

- 1st Runners-up Employee of the Year (2024).

Systems Administrator and Lead Trainer

African Advanced Level Telecommunications Institute (AFRALTI) | July 2013 – May 2024

Key Responsibilities:

- Infrastructure: I architected and maintained complex server and underlying network resources, ensuring smooth operation and peak performance.
- Security: I implemented robust security measures to safeguard sensitive data and keep Cyber threats at bay.
- Troubleshooting: I diagnose issues with precision and swiftly resolve them, minimizing downtime and keeping everyone productive.
- Development: I built and managed engaging websites, crafting compelling content and ensuring a seamless user experience.
- SEO: I optimized websites for visibility, driving organic traffic and boosting online presence.
- Performance: I implemented strategies to enhance website loading times and keep users happy.

Key Projects

- Managed and administered IT infrastructure, Linux Servers and Virtualization for production environment
- Designed and deployed Moodle Elearning platform that handled over 5000 users
- Developed external website and intranet systems on WordPress CMS
- Migrated local infrastructure to cloud platforms, reducing costs by over 30%
- VPS Server Installation and Administration on Linux OS (CentOS/WHM/cPanel)
- Web and Email Hosting (Apache, MySQL, PHP, Exim, Postfix, IMAP, POP, SMTP)
- DNS Management (A, MX, TXT, DKIM, DMARC records)
- Security Management (SSL, TLS, Firewall, Website Security)
- Delivered training on various IT courses like A+, Networking, Linux, Python and DevOps

Education and Certifications

- CISCO – AI Technical Practitioner (AITECH) (2026)
- CISCO – AI Business Practitioner (AIBIZ) (2026)

- KPMG UK – Cyber Threat Intelligence (2025)
- Microsoft – Introduction to Generative AI (2025)
- CISCO – Introduction to Modern AI (2024)
- CompTIA Linux+ (2023)
- CISCO – DevNet Associate (2023)
- Huawei Certified ICT Associate – openEuler Linux (2023)
- Python Certified Associate Programmer (PCAP) (2018)
- Linux System Administration (LPIC-1) (2017)
- EC-Council – Certified Secure Computer User (CSCU) (2016)
- LPI Linux Essentials (2015)
- Panduit Structured Cabling (2006)
- CISCO Certified Network Associate (CCNA) (2005)
