PROFILE

Adept at working effectively in fast-paced, deadline-driven settings that demand strong organizational and analytical skills. Brings hands-on experience in both software engineering and IT support, including expertise in Python, Django, React, REST APIs, and Tailwind for development, alongside skills in network setup, system troubleshooting, and maintenance. Possesses a strong understanding of software engineering principles and IT infrastructure, with a commitment to delivering high-quality work. Demonstrates diligence in troubleshooting and debugging software applications, as well as resolving network and system issues promptly, while working collaboratively with cross-functional teams

PROFESSIONAL EXPERIENCE

Junior Software Developer

01/2025 – present

Securex Agencies Ltd

- Build and maintain responsive user interfaces using React.js.
- Contribute to Python backend development, including RESTful APIs and data handling.
- Work with databases i.e. CRUD operations, queries, and ORM frameworks.
- Debug and fix issues in both frontend and backend under guidance.
- Use Git for version control, collaborating with team members through pull requests and reviews.
- Write basic tests and ensure code quality.
- Support integration of frontend and backend features while learning new technologies.

IT Officer

07/2024 – 12/2024

Dagoretti sub-District Hospital

Nairobi, Kenya

- Assisted in installing and maintaining hardware and software systems to ensure smooth hospital operations.
- Provided technical support and troubleshooting for network, system, and software issues, helping to maintain operational efficiency.
- Collaborated with hospital departments to support IT needs and facilitate seamless technology use in patient care.
- Performed system updates and monitored daily performance to ensure data integrity and security.

Software Engineering Intern

2023 – 2023

Machini Technologies Ltd

- Reviewed existing codebase and provided suggestions for improvement.
- Developed user interfaces with HTML, CSS and JavaScript technologies and django for backend development
- Utilized version control systems such as Git for tracking changes in source code.
- Participated in weekly meetings to facilitate discussion of strategies, solutions, and improvements.
- Collaborated with software engineers to develop and implement software solutions.

IT Intern

2023 – 2023

PC. Kinyanjui Technical College

- Installed operating systems, software updates, and patches in accordance with best practices.
- Resolved network connectivity issues in a timely manner.
- Monitored system performance through daily checks of hardware components and software applications.
- Collaborated with other departments to ensure all IT needs were met in an efficient manner.
