

ATIMANGO VICTORIA

LLM Engineer | Time Zone: Globally Flexible

Nairobi, Kenya | +254-746-535-823 | atimangovictoria775@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE

LLM Engineer with expertise in designing, developing, and deploying scalable multi-modal and multi-lingual AI solutions. Proven ability to build real-time conversational, vision, and agentic AI applications using technologies like LangChain, LangGraph, LiveKit, FastAPI, and React (TypeScript). Expert in RAG architecture, fine-tuning, MCP, and prompt engineering, with a solid understanding of the end-to-end ML lifecycle. Proficient with the OpenAI and Hugging Face ecosystem and skilled in leveraging AWS and GCP. Collaborative and open to feedback to deliver impactful AI solutions for various domains such as Agriculture, Fintech & mental health.

SKILLS

- **Programming Languages:** Python, SQL, R, JavaScript (React with TypeScript), HTML, CSS
- **LLM & AI Tools:** OpenAI, Hugging Face, LangChain, LangGraph, FastAPI, Groq
- **Machine Learning:** Scikit-learn, TensorFlow, Transformers, PySpark, Pandas, NumPy
- **Data & Cloud:** ETL, Apache Airflow, Mage, BigQuery, Docker, GCP, AWS.
- **Visualization:** Streamlit, Matplotlib, Seaborn, Flexdashboards, Rshiny, PowerBI, Looker Studio.
- **Collaboration and Productivity:** Slack, Trello, ClickUp, Google Workspace, Microsoft Teams, Zoom.
- **Soft Skills:** Curious, visionary, innovative, adaptable, and highly collaborative

PROFESSIONAL EXPERIENCE

LLM Engineer (Part-time | Remote).

Cognix LTD (Nairobi, Kenya)

Aug 2025 – Present

- Designing and deploying FastAPI-based LLM backends integrated with Hugging Face models, vector databases (Milvus, Chroma) and custom RAG pipelines.
- Implementing LoRA-based fine-tuning of LLaMA models using Hugging Face's peft, accelerate, and transformers libraries for domain-specific mental health applications.
- Building context-aware RAG systems using sentence-transformer embeddings and custom prompt templates to deliver empathetic and personalized support.
- Developing secure API services with JWT authentication, Docker containerization, and OpenAPI documentation, enabling production-grade model serving.
- Leading the evaluation of LLM responses for assessment delivery, memory consistency, and reformulation handling, ensuring high-quality and safe user interactions.
- Collaborating asynchronously in a cross-functional AI team, contributing ~20-25 hrs/week to build impactful solutions for underserved communities.

Data Scientist / ML Engineer (Fulltime | Remote).

Pezesha Africa Limited (Nairobi, Kenya)

Aug 2024 – Sep 2025.

- Contributed to designing, deploying and monitoring AI agents using RAG and MCP for real-time data access, integrating OpenAI with LangChain/LangGraph to enable multi-step interactions thus reducing response time for policy and data queries.
- Led data pipeline automation and reporting streamlining for Pezesha's Uganda team: Developed procedures using formulas, Google Apps Script & SQL, and triggers for timely updates, reducing processing time from 4 hours to 15 minutes and increasing efficiency by 94%.
- Developed and evaluated credit scoring and predictive models using MLflow and GCP to analyze payment behavior, identify refund-eligible customers, and generate insights for lending and portfolio management.
- Wrote optimized SQL queries on BigQuery for extracting, cleaning, and validating data for dashboards, reports, and ad hoc analyses which supported data-driven decisions across credit, operations, and finance teams.
- Built and managed dynamic dashboards in Superset, Flexdashboard, and R Shiny to track portfolio health, loan performance, repayment behavior, and risk segmentation.
- Supported in experimentation and AB testing for credit strategy, collections, pricing, and product initiatives, providing deep analytics and insights.

Data Assistant (Fulltime | Onsite).

Uganda Registration Services Bureau (Kampala, Uganda)

Apr 2024 - Jul 2024.

- Monitored and maintained the departmental database, ensuring data integrity and accessibility for official use.
- Provided key support in data collection and analysis, contributing to the development of departmental policies and planning.
- Tracked and reported on Key Performance Indicators (KPIs) to identify areas for operational improvement.
- Supported the preparation of M&E reports and other documentation related to departmental initiatives and projects.
- Provided administrative support such as managing petty cash, organizing files, scheduling meetings and taking minutes.

Portfolio Projects. (GitHub [Link](#))

1. **Multi-lingual Mental Health Support Assistant – Cognix (Ongoing):** A conversational assistant capable of supporting multiple languages across Africa to enhance accessibility in mental health care.
2. **Dual Agentic system - Pezesh:** I contributed to building an intelligent chatbot assistant that handled both data and policy-related queries. I led the RAG integration for internal policy document retrieval and merged two agents one connected to BigQuery for real-time data queries and the other for policy responses into a single assistant. We also developed credit scoring models using Random Forest and Linear Regression to evaluate customer risk effectively. [Link](#).
3. **AgroBot:** An AI-powered plant disease diagnosis and advisory system designed to help farmers identify crop diseases and receive actionable treatment recommendations. I sourced and preprocessed a plant disease image dataset from Kaggle, trained a CNN model for classification, and integrated a chatbot powered by an LLM (Llama 3.3). The advisory component was enhanced using a RAG-based system built on agricultural PDFs to provide tailored guidance, such as pesticide use and care tips. I deployed the entire solution with Streamlit and structured the backend modularly for scalability. [Source Code](#).
4. [Google Sheets Apps Script: Automated data retrieval](#) from Big Query with triggers, saving time and improving efficiency.

OTHER TRAININGS

- Certificate in Data Science and Machine learning – *Refractory Programs* Jan 2025 –Jul 2025.
- Transformative leadership training, MasterCard Foundation – *Baobab Platform*.
- Basic python and python for data analysis – *Baobab Platform*.
- Business analytics using Advanced Excel, SQL, Power Bi and Tableau – *Denaco Analytics*.
- Data analytics training using SPSS – *Denaco Analytics*.

LANGUAGE PROFICIENCY

- **English:** (Fluent in both spoken and written, with strong understanding of idioms and nuances)
- **Acholi:** Very Good (Spoken), Good (Written)
- **Luganda:** Very Good (Spoken), Good (Written)
- **French:** Fair (Spoken), Poor (Written)

INTERESTS AND HOBBIES

- Data science and AI.
- Community work and giveback.
- Reading and writing.
- Traveling, Food & Music
- Meeting and interacting with new people.
- Meditating.
