A results-driven Bachelor of Engineering in Electrical and Electronics Engineering graduate from Moi University, with a strong foundation in circuit design, system optimization, and project execution. Known for exceptional problem-solving skills and a commitment to delivering high-quality solutions in team-oriented settings. Enthusiastic about harnessing technical knowledge to innovate and support the goals of a progressive engineering firm.

Professional Experience

Kenya Power and Lighting Company Engineering Attachment

05/24 - 08/24

Thika KPLC

- Assisted in inspecting, maintaining, and repairing electrical distribution systems to ensure reliable power supply to customers.
- Participated in troubleshooting and resolving faults in power distribution networks, including transformers and switchgear.
- Supported the installation, calibration, and testing of energy meters for accurate billing and energy usage tracking.
- Adhered to safety protocols during field operations and maintenance activities to promote a safe working environment.
- Monitored power loads and collaborated with the team to address load balancing issues in the distribution network.
- Engaged with customers to address service issues and supported the implementation of technical
- Prepared technical reports and maintained records related to maintenance and project activities for organizational use
- Diagnosing of faults on low voltage overhead and underground lines, basic repair and maintenance of low voltage network earthing systems and use of overhead line tools and common instruments.

Philafe Engineering Engineering Attachment

05/24 - 09/23

Safaricom MSR, Ritongo

- Assisted in installing and testing new power circuit board equipment to meet operational standards and site demand.
- Inspected power backup systems such as backup generators and battery banks to prevent downtime and ensure uninterrupted power supply
- Supported system upgrades and software updates for site rectifiers and converters to improve power efficiency.
- Conducted network performance assessments and site surveys to optimize coverage by analyzing network traffic, handover success rates, and signal strength to optimize coverage and minimize latency.
- Performed data analysis and created visual signal coverage maps for improved telecommunications efficiency.
- Carried out maintenance, cybersecurity updates, and inspections of electrical and communication

- infrastructure.
- Conducted site surveys and prepared weekly reports on site performance of both electrical and telecommunication equipment.
 - Performed routine maintenance activities on electrical equipment and communication infrastructure, which included inspections and testing, replacement of worn-out and malfunctioning components, cable management, and cybersecurity updates.

Education

Moi University Bachelor Of Engineering (Electrical And Electronics Engineering)	09/19 - 07/25
Ramba Boys High School High School Education	02/15 - 11/18
Migosi Primary Primary School Education	01/07 - 11/14

Projects

A Smart Germ Detection And Disinfection Robot	01/25 - 07/25
• Designed and developed an autonomous robot that detects surface contamination using IR sensors, Bio sensors, and LIDAR. Integrated PWM-controlled UV-C disinfection and a sanitizer spray for safety. Implemented AI-based navigation, Integrate GSM, SLAM algorithm and IoT for remote monitoring, control and data analysis for constant improvements and adaptability, and real-time obstacle avoidance to enhance efficiency in high-touch environments.	
Smart Energy Management System with AI Forecasting	11/23 - 04/24
• Developed a system that monitors and predicts energy consumption using ML. The intelligent system monitors, forecasts, and optimizes energy usage in real-time using machine learning models and fuzzy logic-based control, minimizing energy waste and reducing utility costs. The system had a clear User Interface (UI) with Web dashboard using mobile app via Blynk/IoT platforms displaying Graphs, alerts, controls, and recommendations	

Certification and Awards

- Introduction to AI in Azure - Microsoft [July 2025]
- Machine Learning concepts - Microsoft [July 2025]
- Cloud concepts in Microsoft Azure - Microsoft [June 2025]
- Cloud Managed Networking - Cisco Networking Academy Certification [June 2025]
- AI fundamentals - IBM Certification [February 2025]
- AWS Cloud Practitioner Essentials - Amazon Web Services (AWS) Certification [February 2025]
- Modern AI - Cisco Networking Academy Certification [December 2024]
- IBM Cloud Advocate - IBM Certification [December 2024]
- Data Analytics Essentials and Introduction to Data Science - Cisco Networking Academy Certification [March 2024]
- Python programming Essentials - Cisco Networking Academy Certification with OpenEDG Python Institute [July 2024]
- Data Engineer Associate - Amazon Web Services (AWS) Certification [August 2024]

Key Skills

- Knowledge and experience in key aspects of Artificial Intelligence and Machine Learning (AI and ML), including supervised and unsupervised learning, data preprocessing, model training and evaluation, feature engineering, and algorithm implementation using Python and TensorFlow. Experienced in applying ML models for classification, regression, and predictive analytics
- Highly skilled and proficient in Java, C++ and Python programming for automation, data analysis, and electrical engineering applications.
- Skilled in power systems, circuit design, electrical distribution, energy policy analysis, and sustainable energy technologies.
- Hands-on experience with system optimization and electrical system maintenance with strong familiarity with switchgear operations, energy metering, and load balancing.
- Skilled in PLC programming using Ladder Logic (LD), Function Block Diagram (FBD), Structured Text (ST), and Instruction List (IL), with hands-on experience in designing, debugging, and optimizing automation control systems.
- Proficiency in circuit design and simulation using Proteus, MATLAB, and LabVIEW for system modeling and analysis.
- Strong knowledge of database design, optimization, and security with proficiency in database management systems (Oracle, SQL Server, MySQL)
- Embedded systems development with expertise in microcontroller programming (Arduino, Raspberry Pi) using C/C++ and Python.
- Strong analytical and problem-solving abilities with keen attention to detail.
- Adept at presenting technical findings and engaging with customers or stakeholders with strong written and verbal communication for technical documentation and reporting.
- Ability to work collaboratively in multidisciplinary teams, coordinating with technical personnel and supporting operational goals.
- Commitment to continuous learning and staying updated with emerging technologies.

Interests

- DIY Projects
- Exploring advancements in renewable energy technology.
- Repairing and upcycling old electronic gadgets
- Strategic Gaming
