PROFESSIONAL PROFILE

A versatile and motivated ICT and Administration professional with hands-on experience supporting ICT operations, digital systems, and user support within institutional and program-based environments. Demonstrates practical expertise in hardware and software installation, network support, systems monitoring, and help desk operations, providing both on-site and remote technical assistance. Experienced in managing digital records, institutional information systems, and content management platforms to support accurate data handling and reporting. Skilled in supporting virtual and physical meetings, maintaining IT assets and inventories, and delivering user training to improve technology adoption. Brings a strong commitment to reliable ICT service delivery, data security awareness, and continuous learning within collaborative, mission-driven organizations.

Professional Strengths:

- Filed work, research and community engagement in training, project management and reporting .
- Digital Systems & Data Management: Skilled in updating, organizing, and securing digital files and online repositories, supporting website updates, and assisting in the management of digital documentation, analytics, and social media tools.
- Training & Capacity Building: Proven ability to develop training materials and deliver hands-on ICT training to staff, interns, and field teams, improving digital literacy and operational efficiency.
- Cybersecurity & IT Best Practices: Knowledgeable in backups, password management, system monitoring, and safe data handling to protect organizational information.
- Problem-Solving & ICT Support: Adept at providing technical support for virtual and physical platforms, audiovisuals, and project-based ICT solutions, with the capacity to adapt to field support and emerging ICT needs.

Most Proud of:

- Successfully conducted the Elimu Scholarship Fund through the Jomo Kenyatta Foundation where I shortlisted, interviewed and conducted home visits to enable award vulnerable top students' scholarships
- Successfully trained both junior and senior secondary school teachers on the KEMIS Platform, improving data accuracy and digital proficiency in schools.
- Digitized the education office's operations by transitioning from manual to digital systems—streamlining filing, correspondence, and student registration processes.
- Developed and implemented a shorter exam distribution route for KCSE and KPSEA, resulting in reduced fuel costs and improved time management.

- Led ICT fieldwork that boosted internet coverage by 75% in rural schools, enabling timely subject selection, online exams, and improved classroom integration of technology.

PROFESSIONAL EXPERIENCE

ICT & Admin Professional

September 2024 – October 2025

Ministry of Education Key Contributions:

- Conduct field work for feeding programs in primary and secondary schools through both government and private initiatives
- Ensured service delivery for educational support programs such as junior school projects, drugs and substance abuse campaigns and scout movements
- Administer and monitor national examinations at both the distribution centers and examination centers
- Support day-to-day ICT operations by managing, updating, and maintaining institutional information systems, office computers, printers, networks, and software tools to ensure smooth operations.
- Install, update, and maintain ICT and network infrastructure, including cabling, connectivity, and system upgrades, ensuring reliable and secure access to digital resources.
- Organize, secure, and manage digital data, files, inventories, invoices, and ICT assets, maintaining accurate records and supporting efficient resource utilization.
- Provide technical support for staff, virtual and physical meetings, and departmental operations, including user training and troubleshooting of ICT systems and tools.
- Integrate ICT tools into operational and reporting processes, prepared ICT and administrative reports, and supported coordination of institution-wide activities requiring ICT support.

Network Operations Centre (NOC) Engineer

March 2023 – Aug 2024

SMIC - Airtel Kenya Key Contributions:

- Provided day-to-day technical support and troubleshooting for enterprise networks, systems, and connectivity issues to ensure optimal uptime and service delivery.
- Monitored and managed network performance using platforms such as SolarWinds, NCE, and GPON, proactively identifying incidents and maintaining SLA compliance.
- Managed end-to-end incident resolution through ticketing systems, ensuring accurate documentation, timely updates, and effective issue closure.
- Configured, diagnosed, and supported network devices remotely, including routers and switches, to enhance system reliability and security.
- Coordinated with cross-functional technical teams to support service restoration, planned maintenance, and infrastructure improvements.
- Generated performance and incident reports to support operational monitoring, accountability, and stakeholder communication.
- Supported service provisioning activities, including pre-deployment checks and post-implementation validation to ensure seamless connectivity for users.

IT Attache
County Assembly of Nyeri

May 2022 – Aug 2022

Key Contributions:

- Provided technical support and guidance to colleagues and elected members across various departments, both onsite and remotely via phone, Microsoft Teams, Any Desk, and TeamViewer.
- Installed, maintained, and replaced a variety of hardware, including printers, desktops, and enterprise IT equipment.
- Installed software and user applications across multiple devices, ensuring compatibility and functionality.
- Managed website content by adding and deleting files and documents; handled asset updates and removals within county department stores.
- Conducted network cabling, and performed installation and maintenance of the network infrastructure.
- Updated digital publications on the County Assembly website using WordPress and CMS platforms.
- Organized and tracked IT assets using Microsoft Excel to support asset accountability.
- Managed server operations, including data sharing and regular backups to maintain data integrity and accessibility.
