RELEVANT SKILLS

PROGRAMMING LANGUAGES

- Dart
- Java
- JavaScript
- TypeScript
- Python
- C++

ANDROID APP DEVELOPMENT

- Flutter

FRONTEND DEVELOPMENT

- React
- React native
- React Redux
- Tailwind css

BACKEND DEVELOPMENT

- Node.js
- Spring Boot
- REST API Development
- SQL (PostgreSQL, MySQL)
- No SQL (mongo db)

WORK EXPERIENCE

Software Engineer

Upande LTD

December 2024 to Now (*Ongoing*)

- Built inventory management module in ERPNext for a flower farm in Kenya (Tambuzi LTD). This helps their operations from harvesting, intake, pre-cooling, grading, sales and packing effectively.
- Handled a-lot of traffic by refactoring and iterating on my code till the packing process became smooth. (Packing is a speedy process in flower farms because of high sales.)

Frontend Developer

Doros Wedding

August 2024 to December 2024

- Debugging UI and functionality issues.
- Code refactoring from Next js to React js due to a crucial business requirement limitation of the former.
- Manage and maintain application state efficiently using Redux

EDUCATION HISTORY

Bachelor of Civil Engineering

Institution: Technical University of Kenya

Year of Graduation: 2025 (Completed awaiting graduation)

ACHIEVEMENTS

Built a functional ERP system using Flutter, ERPNext, Python and JS, to help a flower farm in Kenya manage their flowers from harvesting to invoicing.

Nearing graduation in Civil Engineering, a degree that developed problem-solving and analytical skills relevant to software engineering.
