

DATA ANALYST | QUANTITATIVE RESEARCHER | STATISTICIAN | ECONOMIST

QUALIFICATION SUMMARY

Analytical and detail-oriented Quantitative Analyst with a strong academic background in Economics and Statistics and hands-on experience in mathematical modeling, financial data analysis, and algorithm optimization. Skilled in Python, R, SQL, and machine learning, with a proven track record of supporting model development, time-series analysis, and large dataset handling. Adept at drawing insights from market trends, creating data tools, and driving improvements in predictive systems and pricing strategies.

WORK HISTORY

Quantitative Research & Data Analyst 1st June 2024 – 31st July 2025
Turing Enterprises Nairobi - Kenya

- Designed and optimized mathematical models to support algorithmic pricing and predictive decision-making.
- Analyzed structured and unstructured data including real-time signals to detect patterns relevant to financial markets and model performance.
- Conducted statistical testing and hypothesis evaluation to validate assumptions using large datasets.
- Developed and applied machine learning algorithms to identify inefficiencies and improve model accuracy.
- Collaborated with developers and researchers to integrate analytical insights into pricing and trading systems.

Lead Generation Specialist 1st May 2024 - 30th September 2024
Nani Recruitment Agency Nairobi – Kenya

- Conducted market research and behavioral analysis to support business development strategy.
- Identified emerging trends and potential client opportunities using data-driven methods.
- Built detailed client profiles and designed targeted marketing initiatives.
- Implementing and optimizing CRM systems to maintain accurate client records and track interactions, significantly improving client retention and relationship management.

Inventory Analyst 2nd October 2023 - 30th April 2024
Moko Home and Living Mlolongo – Kenya

- Monitored inventory movement and ensured optimal stock levels using historical trend analysis.
- Entered and managed large volumes of inventory data in database systems with precision.
- Analyzed restocking patterns and assisted in demand forecasting to reduce operational gaps.

Research Assistant 1st July 2023 - 31st January 2024
Global South Development Lab Nairobi – Kenya

- Conducted household surveys, collecting demographic and socioeconomic data using standardized questionnaires and

- digital tools like Kobo Collect.
- Facilitated key informant interviews (KIIs) with community leaders, government officials, and subject matter experts to gather in-depth qualitative insights.
- Supported the planning and execution of focus group discussions (FGDs) to explore community perspectives on targeted research topics.
- Used SQL databases for structured data storage, extraction, and management plus created data visualizations and dashboards using Power BI to present research outcomes.

Data Entry Specialist

19th June 2023 - 29th June 2023

African Centre for Women in ICT

Nairobi - Kenya

- Developed a custom data entry screen, improving baseline questionnaire data entry efficiency by using Excel.
- Spearheaded my team in the process of sorting, filing, and serializing of the assigned questionnaires in preparation for data entry, this guaranteed the ease of data accessibility.
- Combined various datasets, performing primary cleaning of all the 340 keyed in questionnaires before submitting to the Monitoring, Evaluation, Reporting, and Learning (MERL) Manager.
- Successfully segregated and saved data into separate folders, handling an estimate of 340 data points weekly, improving data organization by approximately 90%.

EDUCATION

Power Learn Project

Software Development

Feb 2025 – August 2025

The University of Nairobi

Bachelor in economics and Statistics

September 2023

Mathematics Association of Nairobi University

Certificate in Advanced R-Programming, SQL

April 2022

Dalworth Statistical and Training Center

Certificate in ADVANCED MICROSOFT EXCEL

Certificate in Data Analysis (SPSS, STATA)

April 2019

Ribe Girls' Secondary

Kenya Certificate of Secondary Education

November 2017

Mean Grade B+ (72)

SKILLS

- Data analysis: Using R, SPSS, Advanced Ms. Excel, SQL, Python
- Data visualization: Proficient in Power BI, Tableau
- Data Entry
- Report Writing
- IDI Research
