PROFESSIONAL EXPERIENCE

Brave Search, San Francisco, USA

July 2023 – July 2025

Software Engineer (Remote)

- Designed and deployed API endpoints powered by LLMs to extract features, labels and structured data for Brave Search engine, improving data retrieval speed and accuracy.
- Built a data ingestion pipeline to scrape, process, and unify heterogeneous schemas for Points of Interest (POIs), enhancing data integration and search coverage.
- Improved official website detection algorithms, increasing result relevance and accuracy for high-intent queries.
- Localized the Brave Search interface into Swahili, expanding accessibility and user reach to over 200 million Swahili-speaking audiences.

E-kraal Innovation Hub, Nairobi, Kenya

May 2015 – Feb 2023

Software Developer

- Designed and developed an OSINT tool using browser automation, data mining and NLP to automate digital footprint analysis, reducing investigation time by 40% for research and intelligence use cases.
- Initiated creation of over 100 personas to enhance marketing and information dissemination, improving outreach effectiveness.
- Automated an avatar management tool that manages multiple online personas with a view on social media influencing. This increased outreach effectiveness by 50%.
- Built and managed a large social media database of 100,000+ profiles by scraping Facebook, Tinder and Twitter Kenyan users.
- Led a team of 5 developers to successfully deliver two software tools from concept to production, achieving 100% client adoption and sustained support over 2+ years.
- Authored comprehensive user and technical documentation for two software applications, enhancing user understanding and reducing support requests.
- Deployed and optimized software solutions for 8 clients, providing long-term support, version upgrades and feature enhancements.
- Contributed to the Research and Development team for 6 years, driving the development and launch of innovative intelligence and automation tools.
- Conducted Operational Security (OPSEC) and OSINT training for 50+ professionals, strengthening organizational awareness and investigative capabilities.
- Mentored 4 junior developers and OSINT enthusiasts in data mining, automation techniques and ethical research practices, contributing to their professional development.

Nature Surf Systems, Nairobi, Kenya

Jan 2015 – May 2015
