

JOHN NGUGI

Nairobi, Kenya | 0703 112 122 | workwithjohn7@gmail.com

Highly driven ICT Support Specialist with hands-on experience supporting enterprise IT infrastructure, network systems, and mission-critical applications in a high-demand environment. Strong background in user support, incident resolution, and enterprise systems support, ensuring operational continuity and data integrity. Committed to delivering secure, reliable, and efficient ICT services aligned with organisational policies.

PROFESSIONAL EXPERIENCE

IT Support — Safari Park Hotel, Nairobi

Jan 2025 – Present

- Support and maintain mission-critical enterprise systems including POS, Oracle applications, CCTV, door lock systems, and HR systems, ensuring high system availability and operational continuity.
 - Diagnose and resolve hardware, software, network, and DNS-related issues across LAN/WAN environments, minimizing downtime and improving system performance.
 - Configure and troubleshoot email systems and mail flow within Microsoft 365, ensuring reliable message delivery and resolving user email issues.
 - Install, configure, and maintain ICT infrastructure including routers, switches, structured cabling, and communication systems.
 - Support call routing and Microsoft Teams, troubleshooting connectivity and call quality issues.
 - Monitor ICT systems and network infrastructure, identifying trends, risks, and recurring issues, and recommending proactive improvements.
 - Administer Active Directory (ADUC), including user account creation, password resets, access control, and group membership management.
 - Provide technical support for corporate events, virtual meetings, and conferencing systems, ensuring seamless ICT operations.
 - Train end-users on system usage, email systems, and ICT tools, improving system adoption and reducing recurring support requests.
 - Generate system reports and documentation to support IT operations and decision-making.
-

IT Intern — Safari Park Hotel, Nairobi

Sep 2024 – Jan 2025

- Supported daily IT operations including helpdesk support, system maintenance, and troubleshooting of hardware, software, and network issues.
 - Assisted in basic DNS troubleshooting and user email support within Microsoft 365 environments.
 - Monitored system security, malware threats, and supported implementation of data protection measures.
 - Supported audio-visual systems, livestreaming, and virtual conferencing infrastructure.
-

IT Attache — Encapsulated East Africa Ltd, Nairobi

Aug 2023 – Dec 2023

- Assisted in structured cabling installations and data center infrastructure setup.
 - Supported UPS maintenance, power management systems, and electrical installations for ICT environments.
 - Participated in infrastructure testing, system commissioning, and basic network troubleshooting.
-
