SUMMARY

Versatile IT and Telecommunications professional with proven experience across IT support, networking, data analysis, and software development. Skilled in troubleshooting, network operations, ERP systems, and process automation. Adept at analyzing data using Python and SQL, developing custom applications, and providing first-level technical support. Demonstrated success in delivering efficient solutions in corporate, telecom, and non-profit environments. Passionate about applying technology to improve business operations, optimize system performance, and drive data-informed decisions.

EXPERIENCE

IT Graduate Trainee

Hotpoint Appliances Limited

03/2025 - present, Nairobi

- Automated the staff requisition process using Google Apps Script, reducing manual approval time by 40% and cutting repetitive administrative tasks by 15+ hours per month.
- Designed and developed a custom internal web application (React, Express, MySQL) to digitize staff product purchases, improving process accuracy by 30% and reducing paper-based requests by 100%.
- Delivered first-level IT support by resolving an average of 20+ user tickets per week, including troubleshooting hardware/software issues and minimizing downtime across departments.
- Maintained Orion ERP data integrity by managing 500+ item codes, updating pricing, and processing requisitions with a 99% accuracy rate to support inventory tracking and financial reporting.
- Enhanced team problem-solving by actively contributing to solution design sessions, resulting in 3+ implemented process improvements that boosted system reliability.
- Recommended and implemented ERP enhancements, automating repetitive workflows and enabling the IT team to handle 25% more requests without additional staff.

Freelancer

Online platforms

April 2022 - December 2023

- Provided transcription, editing, and content writing services for multiple freelance companies and individual clients, delivering high-quality articles and academic content tailored to specific requirements.
- Collaborated with various AI companies to train large language models (LLMs) by conducting data annotation, entity labeling, and image classification.
- Played a key role in refining AI model responses, enhancing accuracy and contextual relevance.
- Ensured precise data labeling and annotation, contributing to improved model training efficiency and response optimization for AI systems.

Telecommunications Intern

JKUAT Industrial Park

07/2022-10/2022

- Assisted in network administration, troubleshooting, structured cabling, and IT support, ensuring uninterrupted company operations under the supervision of senior IT personnel.
- Conducted daily network connectivity checks, verifying the functionality of VOIP phones across the office. This proactive approach reduced communication downtime by 20% and ensured seamless internal collaboration.
- Led technical setup for meetings, ensuring stable network connections in the conference room and handling projector installation and configuration. This improved meeting efficiency and minimized technical disruptions.
- Served as a computer technician, diagnosing and repairing hardware and software issues. Responsibilities included replacing faulty components, system reboots, software installations, and performing updates.
- Successfully repaired and optimized an average of 10 workstations per week, improving system reliability and employee productivity.

Data Entry Specialist

Catholic Relief Services

04/2022 - 06/2022

- Collaborated with CRS, a non-profit organization, to assist in the design and development of Fundi254, an application aimed at connecting service providers with customers.
- Conducted market research by collecting and analyzing data from 50+ citizens and fundis, identifying key market trends, user preferences, and service gaps.
- Provided data-driven insights to refine the app's functionality and ensure its features were aligned with public needs, improving its potential adoption rate.

Network Intern

Safaricom PLC

11/2023 - 05/2024, Nairobi

- Gained a comprehensive understanding of Network Operations Center (NOC) operations and procedures, actively participating in ticket management using iMaster for network monitoring. Successfully resolved 10 network alarms, ensuring operational efficiency and minimizing downtime.
- Conducted an average of 20 site visits, acquiring in-depth knowledge of site construction, handover procedures, and maintenance protocols. These visits enhanced site performance by 5% and expanded general area coverage, contributing to improved network reliability.
- Led compliance verification for site acquisition by reviewing an average of 500 landlords' leases via the KRA portal to ensure tax compliance. This initiative played a critical role in year-end financial closure and increased verification efficiency by 10%.
- Developed hands-on expertise in Remote Electrical Tilt (RET) configuration, successfully configuring 10 RETs to optimize network coverage and improve signal quality. Applied problem-solving skills to troubleshoot technical issues and enhance system performance.
- Managed inventory tracking and stock issuance in the warehouse division, utilizing Oracle systems and Excel to monitor April's inbound and outbound equipment for internal requisition.
- Collaborated in a hackathon, where my team and I designed and developed Tufikiane, a web platform connecting donors with recipients of aid. Utilized HTML, CSS, JavaScript, and PHP to build a functional, user-friendly friendly system aimed at enhancing social impact.

Computer Technician

Techbiz Limited

01/2023-02/2023

- Assisted in network administration, troubleshooting, structured cabling, and IT support, ensuring uninterrupted company operations under the supervision of senior IT personnel.
- Conducted daily network connectivity checks, verifying the functionality of VOIP phones across the office. This proactive approach reduced communication downtime by 20% and ensured seamless internal collaboration.
- Led technical setup for meetings, ensuring stable network connections in the conference room and handling projector installation and configuration. This improved meeting efficiency and minimized technical disruptions.
- Served as a computer technician, diagnosing and repairing hardware and software issues. Responsibilities included replacing faulty components, system reboots, software installations, and performing updates.
- Successfully repaired and optimized an average of 10 workstations per week, improving system reliability and employee productivity.

EDUCATION

Bsc. Telecommunication and IT

Kenyatta University • 12/2022

SKILLS

- IT Support & Troubleshooting
- Network Administration & Monitoring (NOC, RET, VOIP)
- Data Analysis (Python, Pandas, SQL, Excel)
- ERP Systems (Orion, Oracle)
- Software Development (React, Express)
- Process Automation (Google Apps Script)
